Recommended minimal standards for describing new taxa of the family Halomonadaceae

On page 2437, second paragraph, under the heading ‘Salt/temperature/pH as preliminary tests’, the name ‘Zymomonas palmae’ should read *Zymobacter palmae*. In addition, in Table 1 on page 2439, the last entry should be for the genus *Zymobacter* with the species *Zymobacter palmae* and not ‘Zymomonas palmae’.

*Sphingobium rhizovicinum* sp. nov., isolated from rhizosphere soil of *Fortunella hindsii* (Champ. ex Benth.) Swingle

*International Journal of Systematic and Evolutionary Microbiology* (2008), 58, part 8, pp. 1801–1806

The CCM accession number for the type strain of *Sphingobium rhizovicinum* sp. nov. should be CCM 7491^T^ and not CCM 7941^T^ as given in the abstract and species description.

*Desulfovibrio marinisediminis* sp. nov., a novel sulfate-reducing bacterium isolated from coastal marine sediment via enrichment with Casamino acids

S. Takii, S. Hanada, Y. Hase, H. Tamaki, Y. Uyeno, Y. Sekiguchi and K. Matsuura

*International Journal of Systematic and Evolutionary Microbiology* (2008), 58, part 10, pp. 2433–2438

NMRC 101113^T^ given in the abstract and species description should be NBRC 101113^T^.
