Bacteriophages of *Rhizobium trifolii*. I. Morphology and Host Range. By Y. M. Barnet

The Aerosol Stability of a Strain of Foot-and-Mouth Disease Virus and the Effects on Stability of Precipitation with Ammonium Sulphate, Methanol or Polyethylene Glycol. By D. F. Barlow

Maturation of Infectious Simian Virus 40 in the Presence of Ethidium Bromide. By W. Klietmann, K. Kato and H. Koprowski

The Polypeptides of Adenovirus-infected Cells. By W. C. Russell and J. J. Scehel

Nucleocapsid and Envelope Protein of Semliki Forest Virus as Affected by Canavanine. By M. Rangi

Segregation of Antigenic and Biological Characteristics during Influenza Virus Recombination. By D. Mcahon and G. C. Schild

The Morphogenesis of Pigeonpox Virus. By D. A. Purcell, J. K. Clarke, J. B. Mcferran and D. A. Hughes

Interferon Induction: Rate of Cellular Attachment of Poly IC. By P. M. Pitta, L. W. Marshall and W. A. Carter

Detection of Early Cell Surface Changes in Herpes Simplex Virus Infected Cells by Agglutination with Concanavalin A. By S. S. Tevethia, S. Lowry, W. E. Rawls, J. L. Melnick and V. Mcmillan

Evidence for a New Type-specific Structural Antigen of the Influenza Virus Particle. By G. C. Schild
