JOURNAL OF VIROLOGY

A Publication of the American Society for Microbiology

This dynamic new journal is the result of the growth of the former Virology Section in the Journal of Bacteriology. The purpose of the Journal of Virology has been clearly defined as 'devoted to the dissemination of fundamental knowledge concerning viruses of bacteria, plants, and animals'. Journal content is drawn from original research in all areas of basic virology—biochemistry, biophysics, genetics, immunology, morphology, and physiology.

Contents of a recent issue:

Enhanced Deoxyribonucleic Acid Polymerase Activity in Human Embryonic Kidney Cultures Infected with Adenovirus 2 or 12. NADA LEDINKO.

Ribonucleic Acid Synthesis in Cells Infected with Influenza Virus. D. P. NAYAK AND M. A. BALUDA.

Biophysical Studies on Rhinovirus and Poliovirus. I. Morphology of Viral Ribonucleoprotein. SANDY McCREGOR AND HEATHER D. MAYOR.

Human Adenovirus Type 12 as a 'Helper' for Growth of H-1 Virus. NADA LEDINKO AND HELENE W. TOOLAN.

Infection of Competent Mycobacterium smegmatis with Deoxyribonucleic Acid Extracted from Bacteriophage B1. TOHGU TOKUNAGA AND REIKO M. NAKAMURA.

Deoxyribonucleic Acid Replication in a Bacteriophage Mutants. LOIS ANN SALZMAN AND ARTHUR WEISSBACH.

Synthesis of Soluble Ribonucleates in Escherichia coli Infected with Bacteriophage R17. JAMES B. HUDSON AND WILLIAM PARANCHYCH.

Replication of Bacteriophage Ribonucleic Acid: Analysis of the Ultrastructure of the Replicative Form and the Replicative Intermediate of Bacteriophage R17. NICOLE GRANBOULAN AND RICHARD M. FRANKLIN.

Parental to Progeny Molecular Recombination with Bacteriophage T7. ROBERT C. MILLER, JR.

Published monthly, one volume a year beginning January.

Volume 2 current in 1968.

Subscription price per year: £9. 6s. 6d.

A MULTI-VOLUME WORK . . .

Methods in
Immunology and
Immunochernistry

Edited by Curtis A. Williams and Merrill W. Chase
Both at the Rockefeller University
York Avenue and 66th Street
New York, New York

This new multi-volume work covers the basic methods employed for research in immunology and immunochernistry. Practical procedures with operational details are presented, accompanied in each case by discussions of the problems and common pitfalls. The first four volumes fix the base and breadth of methodology. Subsequent volumes will be devoted to updating or enlarging certain areas in the context of current research trends. The work will provide a definitive handbook and guide to the methods employed in immunological research.

Volume 1
Preparation of
Antigens and Antibodies
1967, 479 pp., $22.00
Subscription price: $18.70*

Volume 2
Physical and Chemical Methods
March 1968, about 425 pp., $22.00
Subscription price $18.70*

IN PREPARATION
Volume 3
Antigen-Antibody Reaction

Volume 4
Studies with Animals,
Cells and Tissues

*Special 15% discount subscription price valid on orders for the complete set received before publication of the last volume.

NEW YORK AND LONDON
111 FIFTH AVENUE, NEW YORK, N.Y. 10003
BERKELEY SQUARE HOUSE, LONDON W.1
IN FOUR VOLUMES / The Most Comprehensive Work in the Field

Methods in Virology

Edited by Karl Maramorosch / Hilary Koprowski

Bryce Thompson Institute for Plant Research / The Wistar Institute of Anatomy and Biology

Yonkers, New York / Philadelphia, Pennsylvania

Volume 1

1967, 640 pp., $26.00 / Subscription price, $22.10*

Volume 2

1968, 644 pp., $28.00 / Subscription price, $23.50*

Volume 3

1967, 637 pp., $27.00 / Subscription price, $22.95*

Volume 4

in preparation

*Special 15% price reduction valid only on subscription orders for the complete set received before publication of the last volume.
Publishes original articles designed for the advancement of knowledge in regard to the bacteria and other micro-organisms. An outstanding journal in the field and a must for any serious worker in bacteriology. Subscription includes the quarterly Bacteriological Reviews. Together a complete and authoritative guide to the current status of bacteriology.

Partial Contents of a recent issue . . .

Effect of High Oxygen Tensions on the Growth of Selected, Aerobic, Gram-negative, Pathogenic Bacteria. SHELDON F. GOTTLIEB AND LEONARD M. PAKMAN.

Inhibition of Staphylococcal Enterotoxin B Formation by Cell Wall Blocking Agents and Other Compounds. MISCHA E. FRIEDMAN.

Pathogenicity and Neurological Effects of Oidiodendron kalrai for Mice. R. P. TEWARI AND C. R. MACPHERSON.

Interaction of Staphylococcal α-Toxin with Artificial and Natural Membranes. JOHN H. FREER, JOHN P. ARBUTHNOTT AND ALAN W. BERNHEIMER.

Cardiobacterium hominis in Genitourinary Specimens. I. J. SLOTNICK.

Maximal Brightness and Yield of Fluorescent Antibody. W. P. OLSON.

Absence of a Circulatory Transport Protein for Staphylococcal Enterotoxin B. SIGURD J. NORMANN AND ROY T. JOHNSEY.

Growth Response of Yeast Cells of Histoplasma capsulatum to Citrated Human Blood Plasma. IILDA McVEIGH AND KATHERINE MORTON.

Factors Affecting the Demonstration of Staphylococcal Free Coagulase and Clumping Factor. S. Y. ALAMI AND G. J. RACE.

Effective Elimination of Drug Resistance and Sex Factors in Escherichia coli by Sodium Dodecyl Sulfate. MUNEMITSU TOMOEDA, MANABU INUZUKA, NORIKO KUBO AND SACHIKO NAKAMURA.

Influence of Anoxia on Radiation-induced Breaks in the Escherichia coli Chromosome. PHILLIP M. ACHEY AND VIVERN G. WHITFIELD.

Genetic Mapping of Regulator Gene phoS for Alkaline Phosphatase in Escherichia coli. HIROYUKI AONO AND NOZOMU OTSUI.

Detection of R Factor-bearing Microorganisms in Laboratory Animals. ELIZABETH H. THEILE, EUGENE L. DULANEY, MARY J. CAREY AND DAVID HENDLIN.

Isolation and Mapping of Salmonella typhimurium Mutants Defective in the Utilization of Trehalose. MARIE L. ST PIERRE.

Isolation of a Suppressor Mutant in Bacillus cereus. SOKOBU AND T. YANAGIDA.

Salmonella typhimurium Proline Mutants. H. ITAKAWA AND M. DEMEREK.

Mitomycin C-sensitive Mutant of Escherichia coli. YASUO IMAE.

Transduction Using ilv Mutants of Salmonella typhimurium-Salmonella montevideo Hybrids. D. A. LABRIE AND F. B. ARMSTRONG.
