The Journal of General Virology

Volume 22 • Part 1 • January 1974

Induction of Virus Ribonucleic Acids in Non-permissive MSV-IF + Cells Infected with NDV. By M-F. DuBois and J. Huppert .................................................... 1
Refractory State of Cells to Interferon Induction. By S. Roussel ........................................ 9
The Significance of Influenza Virus Neuraminidase in Immunity. By R. Rott, H. Becht and M. Orlich ................................................................. 35
Electron Microscopy and Infectivity Studies of the Action of Dimethylsulphoxide on Two Strains of Tobacco Mosaic Virus. By A. Nicolaieff, G. Lebeurier and L. Hirth ............ 43
Heterogeneity of Simian Virus 40 Populations: Virus Particles Containing One or Two Virus DNA Molecules? By F. Sokol, F. K. Huebner, K. B. Tan, M. C. Sheehan and D. Santoli ............................................................... 55
Human Leukocyte Interferon: a Role for Disulphide Bonds. By K. E. Mogensen and K. Cantell ........................................................................................................ 95
Comparative Electrophoretic Studies of Foot-and-Mouth Disease Virus Proteins. By K. Strohmaier and K.-H. Adam ................................................................. 105
Requirement of Arginine for the Replication of Marek's Disease Herpes Virus. By T. Mikami, M. Onuma and T. T. A. Hayashi ....................................................... 115
Newcastle Disease Virus: Virus Particle and RNA Synthesis in Different Host Cells and at Different Temperatures. By J. Huppert, L. Gresland and M. Rosenbergova ................................................................. 129
Some Biophysical Properties of Virus Present in Tissue Cultures Infected with the Nuclear Polyhedrosis Virus of Trichoplusia ni. By J. F. Henderson, P. Faulkner and E. A. MacKinnon ........................................................................................................ 143
An Interfering Component of Rabies Virus which contains RNA. By J. Crick and F. Brown 147
Bacteriophages and Cryptic Lysogeny in Achromobacter. By J. A. Thomson and D. R. Woods 153
