The Journal of General Virology

Volume 64, Part 12, December 1983

ANIMAL

Peroral Infection of Suckling Mice with Milk-borne Mouse Mammary Tumor Virus: Uptake of the Main Viral Antigens by the Gut. By P. Hainaut, C. Francois, C. M. Calberg-Bacq, D. Vaira and P. M. Osterrieth

Synthesis of Full-length, Virus Genomic DNA by Nuclei of Vaccinia-infected HeLa Cells. By L. C. Archard

Coronavirus IBV: Structural Characterization of the Spike Protein. By D. Cavanagh

Molecular Cloning of a Human Rotavirus Genome. By M. Gorziglia, L. W. Cashdollar, G. R. Hudson and J. Esparza

Monoclonal Antibodies Reactive with the Surface and Secreted Glycoproteins of Marek's Disease Virus and Herpesvirus of Turkeys. By K. Ikuta, S. Ueda, S. Kato and K. Hirai

Antigenic Characteristics and Genome Composition of a Naturally Occurring Recombinant Influenza Virus Isolated from a Pig in Japan. By K. Nerome, S. Sakamoto, N. Yano, T. Yamamoto, S. Kobayashi, R. G. Webster and A. Oya

Temperature-sensitive Mutants of Fowl Plague Virus (Influenza A) Generated by Undiluted Passages at 33 °C. By C. Scholtissek and K. Müller

Protein Synthesis in Semliki Forest Virus-infected Cells is Not Controlled by Permeability Changes. By M. A Gray, S. A. Austin, M. J. Clemens, L. Rodrigues and C. A. Pasternak

Isolation of Daudi Cells with Reduced Sensitivity to Interferon. I. Characterization. By M. Dron and M. G. Tovey

Isolation of Daudi Cells with Reduced Sensitivity to Interferon. II. On the Mechanisms of Resistance. By M. G. Tovey, M. Dron, K. E. Mogensen, B. Lebleu, N. Mechti and J. Begon-Lours-Guymarho

Characterization of Eukaryotic Transcriptional Control Signals by Assay of Herpes Simplex Virus Type 1 Thymidine Kinase. By J. C. Lang, N. M. Wilkie and D. A. Spandidos

DNA-binding Proteins Specified by Herpesvirus Saimiri. By E. D. Blair and R. W. Hones

Variable Restriction Endonuclease Sites of Herpes Simplex Virus Type 1 Isolates from Encephalitic, Facial and Genital Lesions and Ganglia. By S. M. J. Chaney, K. G. Warren and J. H. Subak-Sharpe

Induction of a Host-specific Chromatin-associated Glycopolypeptide by Human Cytomegalovirus. By D. Weder and K. D. Radsak

Recurrence of Herpes Simplex in the Mouse Requires an Intact Nerve Supply to the Skin. By T. J. Hill, W. A. Blyth and D. A. Harbour

Alterations in the Recognition of Nucleoside Analogues as Substrates by the Deoxythymidine Kinase of a 5-Methoxymethyldeoxyuridine-resistant Mutant of Herpes Simplex Virus Type 1. By V. Veerisetty, I. K. Veerisetty and G. A. Gentry

The Genomes of Bovine Papillomaviruses Types 3 and 4 are Colinear. By L. W. Coggins, I. Hettich, K. T. Smith, A. A. Slater, F. A. Roe, H. Pfister and M. S. Campo

Mouse Interferon Receptors: A Difference in Their Response to α and β Interferons. By I. Gordon, D. Stevenson, V. Tumas and C. R. Natham

A Temperature-sensitive Mutant of Newcastle Disease Virus which is Affected in Both Haemagglutinin–Neuraminidase and Matrix Proteins. By D. R. Harper, A. C. R. Samson, C. M. Lee and E. Simon

Restriction Endonuclease Analysis of Marek's Disease Virus DNA and Homology between Strains. By L. J. N. Ross, B. Milne and P. M. Biggs

Contents continued on inside back cover
