ANIMAL

Determination of the Sequence Alteration in the DNA of the Herpes Simplex Virus Type 1 Temperature-sensitive Mutant ts K. By M.-J. DAVISON, V. G. PRESTON and D. J. MCGEOCH

Successful Use of Oligopeptides as Immunogens in the Preparation of Antisera to Immediate-Early Gene Products of Herpes Simplex Virus Type 1. By J. W. PALFREYMAN, J. B. MACLEAN, E. MESSEDER and R. C. SHEPPARD

Monoclonal Antibodies to Hepatitis Bc Antigen (HBcAg) Derived from Hepatitis B Core Antigen (HBcAg): Their Use in Characterization and Detection of HBcAg. By R. B. FERNS and R. S. TEDDER

Adaptation of Coronavirus JHM to Persistent Infection of Murine Sac(-) Cells. By H. N. BAYBUTT, H. WEGE, M. J. CARTER and V. TER MEULEN

Monoclonal Antibodies for Study of Antigenic Variation in Coxsackievirus Type B4: Association of Antigenic Determinants with Myocarditic Properties of the Virus. By Y. CAO, D. P. SCHNURR and N. J. SCHMIDT

Rubella Virus: Structural and Non-structural Proteins. By D. S. BOWDEN and E. G. WESTAWAY

Properties of Sindbis Virus Variants from Infected Culex tarsalis Mosquitoes. By D. THEILMANN, B. T. EATON and A. E. R. DOWNE

Gamma Interferon Production and Cytotoxicity of Spleen Cells from Mice Infected with Semliki Forest Virus. By M. J. BLACKMAN and A. G. MORRIS

Monoclonal Antibodies to Human Respiratory Syncytial Virus and Their Use in Comparison of Different Virus Isolates. By H. B. GIMENEZ, P. CASH and W. T. MELVIN

Abortive Infection of Mumps Virus in Murine Cell Lines. By A. YAMADA, M. TSURUDOME, M. HISHIYAMA and Y. ITO

Distribution of Rabies Virus, Interferon and Interferon-mediated Enzymes in the Brains of Virus-infected Rats. By R. MARCOVISTZ, A. G. HOVANESSIAN and H. TSIANG

Effect of N-Acetyl-muramyl-l-alanyll-d-isoglutamine on Interferon Production in Mice by Newcastle Disease Virus. By T. SAKUMA, M. AZUMA and I. YOSHIDA

Antibodies to Hepatitis B Surface Antigen (HBsAg) Elicited by Immunization with a Synthetic Peptide Covalently Linked to Liposomes. By A. R. NEURATH, S. B. H. KENT and N. STRICK
