The Journal of General Virology
Volume 65, Part 9, September 1984

PROKARYOTIC
Characterization of the Genome of a Rod-shaped Virus Infecting Spiroplasma citri. By M. J. DICKINSON and R. TOWNSEND 1607-1610

FUNGAL
Evidence for Sequence Heterogeneity among the Double-stranded RNA Segments of Penicillium chrysogenum Mycovirus. By S.P. EDMONDSON, D. LANG and D. M. GRAY 1591-1599

PLANT
Complete Nucleotide Sequence of a Satellite RNA of Tomato Black Ring Virus. By M. MEYER, O. HEMMER and C. FRITSCH 1575-1583
Double-stranded RNA of Rice Gall Dwarf Virus. By T. HIBI, T. OMURA and Y. SAITO 1585-1590

ANIMAL
Synthesis of α (Immediate-Early) Proteins in Vero Cells Infected with Pseudorabies Virus. By M. L. FENWICK and M. McMENAMIN 1449-1456
Identification of a Herpes Simplex Virus Type 1 Polypeptide Which Is a Component of the Virus-induced Ribonucleotide Reductase. By V. G. PRESTON, J. W. Palfreyman and B. M. Dutia 1457-1466
Identification of Two Herpes Simplex Virus Type 1-induced Proteins (21K and 22K) which Interact Specifically with the α Sequence of Herpes Simplex Virus DNA. By R. G. DALZIEL and H. S. MARSDEN 1467-1475
Pathogenesis of Zosteriform Spread of Herpes Simplex Virus in the Mouse. By W. A. BLYTH, D. A. HARBOUR and T. J. HILL 1477-1486
Effect of Recombinant DNA-produced Bovine Interferon Alpha (BoIFN-α) on the Interaction between Bovine Alveolar Macrophages and Bovine Herpesvirus Type 1. By H. BIELEFELDT OHMANN, J. E. GILCHRIST and L. A. BABIUK 1487-1495
Reversible Inhibition of Bovine Parvovirus DNA Replication by Aphidicolin and L-Canavanine. By A. T. ROBERTSON, R. C. BATES and E. R. STOUT 1497-1505
A Sequential Study of Virus Expression in Retrovirus-induced Arthritis of Goats. By P. KLEVJER-ANDERSON, D. S. ADAMS, L. W. ANDERSON, K. L. BANKS and T. C. McGUIRE 1519-1525
Host Genetic Control of Mouse Hepatitis Virus Type 4 (JHM Strain) Replication. I. Restriction of Virus Amplification and Spread in Macrophages from Resistant Mice. By R. L. KNOBLER, L. A. TUNISON and M. B. A. OLDSTONE 1543-1548

Contents continued on inside back cover

Inactivation of Foot-and-Mouth Disease Virus Vaccine Strains by Activation of Virus-associated Endonuclease. By E. A. Scodeeller, M. A. Lebendiker, M. S. Dubra, O. A. Crespo, O. Basarab, J. L. La Torre and C. Vasquez

Nuclease Sensitivity of Adenovirus Type 2 Chromatin in Lytic Infection. By M. Toth and J. Weber

Interaction Between Mouse Hepatitis Viruses and Primary Cultures of Kupffer and Endothelial Liver Cells from Resistant and Susceptible Inbred Mouse Strains. By C. A. Pereira, A. M. Steffan and A. Kirn

The Phosphorylation of Ribosomal Protein S6 in Hamster Fibroblasts Infected with Pseudorabies Virus Inactivated by Ultraviolet Radiation. By I. M. Kennedy, D. P. Leader and W. S. Stevely

Monoclonal Antibodies to Herpes Simplex Virus Thymidine Kinase. By L. M. Banks, P. J. Vaughan, D. Meredith and K. L. Powell

Identification of a Phosphorylated Non-structural Form of the P Protein of Newcastle Disease Virus and Analysis of P Multimers. By L. E. Hightower, P. L. Collins and G. W. Smith

---

THE SOCIETY FOR GENERAL MICROBIOLOGY

The Society for General Microbiology was founded to promote the advancement of microbiology, providing a common meeting ground for those working in various specialized fields including medical, veterinary, agricultural and economic microbiology. The Society is concerned with the more fundamental aspects of the study of bacteria, viruses, microfungi, protozoa and microscopic algae and in their various biological activities, its members being united by the common aim of developing scientific knowledge concerning micro-organisms.

The annual subscriptions to the Society for 1984 are as follows:

Ordinary Member receiving either the Journal of General Microbiology or the Journal of General Virology £27.00 (U.S.$53.00)

Ordinary Member receiving both Journals £55.00 (U.S.$106.00)

Ordinary Member who does not receive Journals £12.00 (U.S.$26.00)

Student or Retired Member £5.00 (U.S.$11.00)

All correspondence concerning applications for membership, changes of name and address, or payment of subscriptions should be sent to the Society for General Microbiology, Harvest House, 62 London Road, Reading RG1 5AS, U.K.

All communications concerning the purchase of the Journals by non-members should be addressed to the Society for General Microbiology (Journal Sales), 62 London Road, Reading RG1 5AS, U.K. Further details are given at the front of this Journal.
