The Journal of General Virology
Volume 66, Part 12, December 1985

BACTERIAL
Characterization of Streptococcal Bacteriophage c6A. By I. B. Powell and B. E. Davidson

FUNGAL

PLANT
Comparisons between the Primary Structure of the Coat Proteins of Turnip Yellow Mosaic Virus and Eggplant Mosaic Virus. By A. Dupin, D. Collot, R. Peter and J. Witz
Particles of Rice Gall Dwarf Virus in Thin Sections of Diseased Rice Plants and Insect Vector Cells. By T. Omura, H. Hibino, H. Inoue and T. Tsuchizaki
Translation of Tobacco Ringspot Virus RNA in Reticulocyte Lysate: Proteolytic Processing of the Primary Translation Products. By S. A. Jobling and K. R. Wood
Expression of High Molecular Weight Polypeptides by Carnation Mottle Virus RNA. By S.-A. Harbison, J. W. Davies and T. M. A. Wilson

ANIMAL
Agent Replication Dynamics in a Long Incubation Period Model of Mouse Scrapie. By M. E. Bruce
Neutralization of Yellow Fever Virus Studied using Monoclonal and Polyclonal Antibodies. By A. Buckley and E. A. Gould
Cytotoxic Lymphocytes in the Lungs of Mice Infected with Respiratory Syncytial Virus. By G. Taylor, E. J. Stott and A. J. Hayle
Delta-9-Tetrahydrocannabinol Decreases Host Resistance to Herpes Simplex Virus Type 2 Vaginal Infection in the B6C3F1 Mouse. By E. M. Mishkin and G. A. Cabral

Two Initiation Sites for Foot-and-Mouth Disease Virus Polyprotein in vivo. By B. E. Clarke, D. V. Sangar, J. N. Burroughs, S. E. Newton, A. R. Carroll and D. J. Rowlands

Contents continued on inside back cover

Intermolecular Recombination of the Herpes Simplex Virus Type 1 Genome Analysed Using Two Strains Differing in Restriction Enzyme Cleavage Sites. By K. Umene ........................................................................ 2659–2670

A Proposal for Naming Adenovirus Genome Types, Exemplified by Adenovirus Type 6. By Th. Adrian, B. Best and R. Wigand .................................................................................. 2685–2691

Antibody to the 32K Structural Protein of Infectious Bursal Disease Virus Neutralizes Viral Infectivity *in vitro* and Confers Protection on Young Chickens. By K. J. Fahey, I. J. O'Donnell and T. J. Bagust ................................................................. 2693–2702

Reassortment of Human Rotaviruses Carrying Rearranged Genomes with Bovine Rotavirus. By A. M. Allen and U. Desselberger ........................................................................ 2703–2714

Release of Progeny Virus from Cells Infected with Simian Rotavirus SA11. By C. Musalem and R. T. Espejo ................................................................................................. 2715–2724

Rapid Inactivation of Rotaviruses by Exposure to Acid Buffer or Acidic Gastric Juice. By C. Weiss and H. F. Clark ......................................................................................... 2725–2730

Detection and Localization of the v-myb(AMV) Gene Products of Avian Myeloblastosis Virus by a Synthetic Peptide Antiserum. By S. E. Wright, D. P. Smith and D. E. Wright ................................................................. 2755–2760

Identification of Dengue Type 2 Virus-specific High Molecular Weight Proteins in Virus-infected BHK Cells. By G. R. Cleaves .................................................................................. 2767–2771

Two Monoclonal Antibodies against La Crosse Virus Show Host-dependent Neutralizing Activity. By L. J. Grady and W. Kinch ......................................................................... 2773–2776

Influence of Interferon on Persistent Infection Caused by Borna Disease Virus *in vitro*. By F. von Rheinbaben, L. Stitz and R. Rott ........................................................................ 2777–2780

Inhibition of Herpes Simplex Virus Type 1-induced Interferon Synthesis by Monoclonal Antibodies against Viral Glycoprotein D and by Lysosomotropic Drugs. By P. Lebon ......................................................................................... 2781–2786

Index of Authors for Volume 66, Parts 1–12 ................................................................. 2793–2819

Index of Subjects for Volume 66, Parts 1–12 .................................................................. 2821–2840
