The Journal of General Virology
Volume 66, Part 3, March 1985

REVIEW ARTICLE
Semliki Forest Virus Infection of Mice: A Model for Genetic and Molecular Analysis of Viral Pathogenicity. By G. J. Atkins, B. J. Sheahan and N. J. Dimmock...395-408

PLANT
Polyethylene Glycol-mediated Infection of Cowpea Protoplasts with Sonchus Yellow Net Virus. By N. A. M. Van Beek, A. C. G. Derksen and J. Dijkstra...551-557
Cauliflower Mosaic Virus DNA Persists as Supercoiled Forms in Cultured Turnip Cells. By F. Rollo and S. N. Covey...603-608

ANIMAL
Purification and Characterization of the Respiratory Syncytial Virus Fusion Protein. By E. E. Walsh, M. W. Brandris and J. J. Schlesinger...409-415
Respiratory Syncytial Virus Polypeptides. IV. The Oligosaccharides of the Glycoproteins. By C. Gruber and S. Levine...417-432
Preparation and Characterization of Monoclonal Antibodies Directed against Four Structural Components of Canine Distemper Virus. By C. Örvell, H. Sheshberradaran and E. Norrby...443-456
Amino Acid Sequences of Haemagglutinins of Influenza Viruses of the H2 Subtype Isolated from Horses. By R. S. Daniels, J. J. Skehel and D. C. Wiley...457-464
Phosphopeptide Fingerprinting of Nucleoproteins of Various Influenza A Virus Strains Grown in Different Host Cells. By O. Kistner, H. Müller, H. Becht and C. Scholtissek...465-472
Entry of Poliovirus Type 1 and Mouse Elberfeld (ME) Virus into Hep-2 Cells: Receptor-mediated Endocytosis and Endosomal or Lysosomal Uncoating. By H. Zeichhardt, K. Wetz, P. Willingham and K.-O. Habermehl...483-492
Mouse Interferon Alpha and Beta Genes Are Linked at the Centromere Proximal Region of Chromosome 4. By J. A. G. M. van der Korpuit, J. Hilken, V. Kroezen, E. C. Zwarthoff and J. Trapman...493-502
Effect of Borna Disease Virus Infection on Athymic Rats. By S. Herzog, K. Wonigeit, K. Frese, H. J. Hiedrich and R. Rott...503-508
Herpes Simplex Virus Sequences Involved in the Initiation of Oncogenic Morphological Transformation of Rat Cells Are Not Required for Maintenance of the Transformed State. By I. R. Cameron, M. Park, B. M. Dutia, A. Orr and J. C. M. Macnab...517-527
Replication of Orvctes Baculovirus in Cell Culture: Viral Morphogenesis, Infectivity and Protein Synthesis. By A. M. Crawford and C. Sheehan...529-539
Baculovirus Replication: Uptake of Trichoplusia ni Nuclear Polyhedrosis Virus Particles by Insect Cells. By X. Wang and D. C. Kelly...541-550
Synthesis of Proteins and Glycoproteins in Dengue Type 2 Virus-infected Vero and Aedes albopictus Cells. By G. W. Smith and P. J. Wright...559-571
Sequences of the Nucleocapsid Genes from Two Strains of Avian Infectious Bronchitis Virus. By M. E. G. Boursnell, M. M. Binns, I. J. Foulks and T. D. K. Brown...573-580

Contents continued on inside back cover
Coronavirus MHV-JHM mRNA 5 Has a Sequence Arrangement which Potentially Allows Translation of a Second, Downstream Open Reading Frame. By M. A. SKINNER, D. EBNER and S. G. SIDDELL ........................................... 581–592
Coding Sequence of Coronavirus MHV-JHM mRNA 4. By M. A. SKINNER and S. G. SIDDELL ........................................... 593–596
Peptide Mapping of Envelope-related Glycoproteins Specified by the Flaviviruses Kunjin and West Nile. By P. J. WRIGHT and H. M. WARR ........................................... 597–601
Lack of Quantitative Correlation between the Neutralization of Poliovirus and the Antibody-mediated pl Shift of the Virions. By P. BRIOEN, A. A. M. THOMAS and A. BOEYÉ ........................................... 609–613
Extracellular Release of Enveloped Vaccinia Virus from Mouse Nasal Epithelial Cells in vivo. By L. G. PAYNE and K. KRISTENSSON ........................................... 643–646

THE SOCIETY FOR GENERAL MICROBIOLOGY

The Society for General Microbiology was founded to promote the advancement of microbiology, providing a common meeting ground for those working in various specialized fields including medical, veterinary, agricultural and economic microbiology. The Society is concerned with the more fundamental aspects of the study of bacteria, viruses, micro-fungi, protozoa and microscopic algae and in their various biological activities, its members being united by the common aim of developing scientific knowledge concerning micro-organisms.

The annual subscriptions to the Society for 1985 are as follows:
Ordinary Member receiving either the Journal of General Microbiology or the Journal of General Virology ........................................... £28.00 (U.S.$45.00)
Ordinary Member receiving both Journals ........................................... £55.00 (U.S.$88.00)
Ordinary Member who does not receive Journals ........................................... £12.00 (U.S.$20.00)
Student or Retired Member ........................................... £5.00 (U.S.$8.00)

All correspondence concerning applications for membership, changes of name and address, or payment of subscriptions should be sent to the Society for General Microbiology, Harvest House, 62 London Road, Reading RG1 5AS, U.K.

All communications concerning the purchase of the Journals by non-members should be addressed to the Society for General Microbiology (Journal Sales), 62 London Road, Reading RG1 5AS, U.K. Further details are given at the front of this Journal.
