General Characteristics, Gene Organization and Expression of Small RNA Viruses of Insects. By N. F. Moore, B. Reavy and L. A. King 647-659

PLANT
Location of Structural Proteins in Particles of Rice Gall Dwarf Virus. By T. Omura, Y. Minobe, M. Matsuoka, Y. Nozu, T. Tsuchizaki and Y. Saito 811-815
Sequence Relationships among Soil-borne Wheat Mosaic Virus RNA Species and Terminal Structures of RNA II. By Y. H. Hsu and M. K. Brakke 915-919
Cauliflower Mosaic Virus Aphid Transmission Facilitated by Transmission Factors from Other Caulimoviruses. By P. G. Markham and R. Hull 921-923
Double-stranded Replicative Form RNA Molecules of Cowpea Mosaic Virus Are Not Infectious. By M. Shanks, G. P. Lomonossoff and D. Evans 925-930

ANIMAL
Protein Kinase Activities Associated with the Virions of Pseudorabies and Herpes Simplex Virus. By W. S. Stevely, M. Katan, V. Stirling, G. Smith and D. P. Leader 661-673
Stimulation of Fibroblast Interferon Production by a 22K Protein from Human Leukocytes. By J. Van Damme, G. Opdenakker, A. Billiau, P. De Somer, L. De Wit, P. Poupart and J. Content 693-700
Role of Sex and Early Interferon Production in the Susceptibility of Mice to Encephalomyocarditis Virus. By B. Pozzetto and I. Gresser 701-709
Cloning and Sequencing of the Gene Encoding the Spike Protein of the Coronavirus IBV. By M. M. Binns, M. E. G. Boursnell, D. Cavanagh, D. J. C. Pappin and T. D. K. Brown 719-726

Contents continued on inside back cover

The Cytotoxic Response to Murine Cytomegalovirus. II. In vitro Requirements for Generation of Cytotoxic T Cells. By V. G. Sinickas, R. B. Ashman and R. V. Blanden

The Experimental Infection of Chickens with Mixtures of Infectious Bronchitis Virus and Escherichia coli. By H. Williams Smith, J. K. A. Cook and Z. E. Parsell

Isolation of Daudi Cells with Reduced Sensitivity to Interferon. III. Interferon-induced Proteins in Relation to the Phenotype of Interferon Resistance. By M. Dron, M. G. Tovey and P. Eid

Genetic and Antigenic Variations among Geographical Isolates of Sindbis Virus. By K. Olson and D. W. Trent

Isolation of Monoclonal Antibodies Specific for Rous Sarcoma Virus Structural, Polymerase and Transforming Proteins and Their Use for the Study of Mutant Virus-infected Cells. By R. Kurth, T. Tanaka and K. Moelling

Comparison of RNA from Healthy and Scrapie-infected Hamster Brain. By T. L. German, B. C. McMillan, B. E. Castle, C. Dees, W. F. Wade and R. F. Marsh

Inactivation of the Scrapie Agent by Ultraviolet Irradiation in the Presence of Chlorpromazine. By C. Dees, W. F. Wade, T. L. German and R. F. Marsh

Characterization of Proteins in Membrane Vesicles from Scrapie-infected Hamster Brain. By C. Dees, T. L. German, W. F. Wade and R. F. Marsh

Characterization of Lipids in Membrane Vesicles from Scrapie-infected Hamster Brain. By C. Dees, T. L. German, W. F. Wade and R. F. Marsh

Enhancing Antibodies, Macrophages and Virulence in Mouse Cytomegalovirus Infection. By T. Inada, K. T. Chong and C. A. Mims

Association of Virulence of Murine Cytomegalovirus with Macrophage Susceptibility and with Virion-bound Non-neutralizing Antibody. By T. Inada and C. A. Mims

Interferon Induction by Viruses. XII. Inhibition of Protein Synthesis Renders Aged Chick Embryo Cells Refractory to Interferon Induction. By C. Svitlik and P. I. Marcus

Human Interferons Alpha and Beta Have More Potent Priming Activities than Interferon Gamma. By M. Tóth, V. Endrész, S. Tóth and I. Béládi

In situ Localization of the Major Capsid Protein during Lytic Infection by Herpes Simplex Virus. By V. Bibor-Hardy, A. Dagenais and R. Simard

Mechanisms of Neutralization of Influenza Virus by IgM. By H. P. Taylor and N. J. Dimmock

The Induction of Myeloid Leukaemias by Rauscher Murine Leukaemia Virus. By N. J. de Both, T. J. Stoof, M. Kranendonk, K. Stoker, W. P. Vonk and J. N. M. Mol
