REVIEW ARTICLE

BACTERIAL

The Virion Proteins and Ultrastructure of Staphylococcus aureus Bacteriophages. By J. S. LEE and P. R. STEWART ........................................... 2017-2027

Transcription of the Bacillus subtilis Bacteriophage φ3T in vitro. By E. KENNY, T. ATKINSON and B. S. HARTLEY ........................................... 2029-2032

FUNGAL

PLANT

Infection of Cowpea Protoplasts with Cymbidium Ringspot Virus. By M. RUSSO and D. GALLITELLI ........................................... 2033-2037

ANIMAL

Monoclonal Antibodies to Murine Retrovirus Protein p30. By J. C. CHUAT, M. GRCE, C. PILON and M. C. GUILLEMIN ........................................... 1855-1862

Monoclonal Antibody Detects a Common Surface Antigen on Two Independently Established Murine Moloney Sarcoma Virus Non-producer Transformants. By E. WEILAND and H.-J. THIEL ........................................... 1863-1872

An Adenovirus Cytocidal Function Related to the Control of a Cellular pH 4 Endonuclease Activity. By J. C. D'HALLUIN, C. DELSERT, M. MILLEVILLE and P. BOULANGER ........................................... 1873-1887

Biochemical Evidence for the Oligomeric (Possibly Trimeric) Structure of the Major Inner Capsid Polypeptide (45K) of Rotaviruses. By M. GORZIGLIA, C. LARREA, F. LIPRANDI and J. ESPARZA ........................................... 1889-1900

Analysis of the Secondary Structure of the Poly(C) Tract in Foot-and-Mouth Disease Virus RNAs. By E. J. C. MELLOR, F. BROWN and T. J. R. HARRIS ........................................... 1919-1929

Chromatin Structure of Epstein–Barr Virus. By P. J. DYSON and P. J. FARRELL ........................................... 1931-1940

Contents continued on inside back cover

Identification of Cross-reacting Glycoproteins of Four Herpesviruses by Western Blotting. By B. W. Snowden and I. W. Halliburton .................. 2039–2044

Enhanced Intranuclear Expression of Measles Virus Following Exposure of Persistently Infected Cells to Cyclic AMP. By S. J. Robbins and J. P. Eagle .................. 2065–2070

Induction of Chronic Measles Encephalitis in C57BL/6 Mice. By S. P. K. Chan .................. 2071–2076

CORRIGENDA

Antigenic and Biochemical Analysis of gB of Herpes Simplex Virus Type 1 and Type 2 and of Cross-reacting Glycoproteins Induced by Bovine Mammillitis Virus and Equine Herpesvirus Type I. By B. W. Snowden, P. R. Kinchington, K. L. Powell and I. W. Halliburton .................. 2077
