Cambridge University Press invites you to subscribe to one of the leading international journals in the field of infectious diseases. Epidemiology and Infection was founded in 1901 as the Journal of Hygiene. It publishes original reports and reviews on all aspects of infection in man and animals.

Particular emphasis is given to the epidemiology, prevention and control of infectious diseases, but the field covered is broad and includes microbiology, virology, immunology, sanitary bacteriology, food hygiene, statistics and the clinical diagnostic and social aspects of infectious diseases. Papers cover both the medical and veterinary field and come from scientists worldwide. There are six issues a year forming two volumes and it is available to 1987 subscribers at £90 ($205). The 1986 volumes are still available at £84 ($199).

Recent topics have been:

KILPATRICK et al: Tuberculous meningitis – clinical and laboratory review of 100 patients

BRIDGER AND POCOK: Variation in virulence of bovine rotaviruses

MEERS: Yellow fever in Swansea, 1865

KINGSTON et al: Self-disinfecting plastics for intravenous catheters and prosthetic inserts

WRIGHT: The seasonality of bacterial quality of water in a tropical developing country (Sierra Leone)

SHEPHERD et al: Experimental plague infection in South African wild rodents
