The Journal of General Virology
Volume 69, Part 5, May 1988

BACTERIAL
Formation of Complexes between Long Tail Fibres and Substructural Elements of Phage T4D. By N. K. ABULADZE, A. I. TOURKIN, E. L. ZHILENKOV and B. F. POGLAZOV 969–974

FUNGAL
Relationships and Functions of Virus Double-stranded RNA in a P4 Killer Strain of Ustilago maydis. By S. L. SHELBOURN, P. R. DAY and K. W. BUCK 975–982

PLANT
Characterization of Maize Streak Virus Isolates from Different Plant Species by Polyclonal and Monoclonal Antibodies. By E. L. DEKKER, M. S. PINNER, P. G. MARKHAM and M. H. V. VAN REGENMORTEL 983–990
Detection of Potato Virus X by One Incubation Europium Time-resolved Fluorimunoassay and ELISA. By R. SINIJÄRVI, L. JÄRVEKÜLG, E. ANDREEVA and M. SAARMA 991–998
Isolation of Defective Interfering Particles of Sonchus Yellow Net Virus from Chronically Infected Plants. By I. D. ISMAIL and J. J. MILNER 999–1006
Analysis of in vitro Translation of Bean Yellow Mosaic Virus RNA: Inhibition of Proteolytic Processing by Antiserum to the 49K Nuclear Inclusion Protein. By C-A. CHANG, E. HIEBERT and D. E. PURCIFULL 1117–1122

ANIMAL
Biochemical and Serological Comparisons of Australian Bunyaviruses Belonging to the Simbu Serogroup. By D. A. MCPHEE and A. J. DELLA-POR TA 1007–1017
Protective Effects of Monoclonal Antibodies against Parainfluenza Virus Type 3-induced Brain Infection in Hamsters. By R. RYDBECK, A. LÖVE and E. NORRBY 1019–1024
Sequence Analysis of an 11-2 Kilobase, Near-terminal, BamHI Fragment of Fowlpox Virus. By F. TOMLEY, M. BINNS, J. CAMPBELL and M. BOURS NELL 1025–1040
Identification of the Coronavirus MHV-JHM mRNA 4 Product. By D. EBNER, T. RAABE and S. G. SIDDELL 1041–1050
Effects of Immunocompetence on the Establishment and Maintenance of Latency with Marek’s Disease Herpesvirus. By C. BUSCAGLIA, B. W. CALNEK and K. A. SCHAT 1067–1077
Enhanced in vitro Reactivation of Herpes Simplex Virus Type 2 from Latently Infected Guinea-pig Neural Tissues by 5-Azacytidine. By D. E. STEPHANOPoulos, J. C. KAPPEs and D. I. BERNSTEIN 1079–1083

The Effect of Sequences in the 5' Non-coding Region on the Replication of Polioviruses in the Human Gut. By P. D. Minor and G. Dunn 1091–1096

ADDENDUM
An Antigenic Analysis of the Adenovirus Type 2 Fibre Polypeptide. By G. Watson, M. G. Burdon and W. C. Russell 1123
