PLANT

Expression of cauliflower mosaic virus gene I in insect cells using a novel polyhedrin-based baculovirus expression vector

Genomic characterization of phenotypic variants of beet curly top virus
D. C. Stenger, D. Carbonaro and J. E. Duffus 2211–2215

Nucleotide sequence of rice dwarf virus genome segment 4
I. Uyeda, H. Kudo, N. Yamada, T. Matsumura and E. Shikata 2217–2222

A classification of the tobamoviruses based on comparisons among their 126K proteins
A. Fraile and F. García-Arenal 2223–2228

Antigenic analysis of the coat protein of beet necrotic yellow vein virus by means of monoclonal antibodies

Translation of cucumber necrosis virus RNA in vitro
J. C. Johnston and D. M. Rochon 2233–2241

Nucleotide sequence and evolutionary relationships of cucumber mosaic virus (CMV) strains: CMV RNA 3

Expression of the genome of potato leafroll virus: readthrough of the coat protein termination codon in vivo
I. Bahner, J. Lamb, M. A. Mayo and R. T. Hay 2251–2256

Ribozymes that cleave potato leafroll virus RNA within the coat protein and polymerase genes
J. W. Lamb and R. T. Hay 2257–2264

Characterization of a potato leafroll luteovirus subgenomic RNA: differential expression by internal translation initiation and UAG suppression
E. Tacke, D. Prüfer, F. Salamini and W. Rohde 2265–2272

Potato virus Y helper component protein is associated with amorphous inclusions
D. A. Baunoch, P. Das and V. Hari 2479–2482

ANIMAL

Production of a non-functional nef protein in human immunodeficiency virus type 1-infected CEM cells

Inhibition of the uncoating of bovine enterovirus by short chain fatty acids
N. Ismail-Cassim, C. Chezzi and J. F. E. Newman 2283–2289
