REVIEW ARTICLE

Cell transformation by animal papillomaviruses

M. S. Campo

PLANT

Cooperative binding of the red clover necrotic mosaic virus movement protein to single-stranded nucleic acids

T. A. M. Osman, R. J. Hayes and K. W. Buck

The topography of the surface of potato virus X: tritium planigraphy and immunological analysis

A number of subgenomic DNAs are produced following agroinoculation of plants with beet curly top virus

D. C. Stenger, M. C. Stevenson, S. G. Hormuzdi and D. M. Bisaro

Production of the tobacco mosaic virus (TMV) transport protein in transgenic plants is essential but insufficient for complementing foreign virus transport: a need for the full-length TMV genome or some other TMV-encoded product

The nucleotide sequence and genome organization of strawberry mild yellow edge-associated potexvirus

W. Jelkmann, E. Maiss and R. R. Martin

A 1.5 kb sequence homology in 3'-terminal regions of RNA-1 and RNA-2 of a birch isolate of cherry leaf roll nepovirus is also present, in part, in a rhubarb isolate

N. W. Scott, J. I. Cooper, Y. Y. Liu and C. U. T. Hellen

Nucleotide sequence analysis of the genomes of the MAV-PS1 and P-PAV isolates of barley yellow dwarf virus

Comparison of the strategies of expression of five tymovirus RNAs by \textit{in vitro} translation studies

G. Kadaré, G. Drugeon, H. S. Savithri and A.-L. Haenni

ANIMAL

Contribution of single genes within the unique short region of Aujeszky's disease virus (suid herpesvirus type 1) to virulence, pathogenesis and immunogenicity

Processing of human cytomegalovirus envelope glycoproteins in and egress of cytomegalovirus from human astrocytoma cells

B. Kari, R. Radeke and R. Gehrz

Latent equid herpesviruses 1 and 4: detection and distinction using the polymerase chain reaction and co-cultivation from lymphoid tissues

H. M. Welch, C. G. Bridges, A. M. Lyon, L. Griffiths and N. Edington
Characterization of enveloped tegument structures (L particles) produced by alphaherpesviruses: integrity of the tegument does not depend on the presence of capsid or envelope

J. McLauchlan and F. J. Rixon 269–276

Assembly of enveloped tegument structures (L particles) can occur independently of virion maturation in herpes simplex virus type 1-infected cells

F. J. Rixon, C. Addison and J. McLauchlan 277–284

Hexamethylene bisacetamide stimulates herpes simplex virus immediate early gene expression in the absence of trans-induction by Vmw65

M. McFarlane, J. I. Daksis and C. M. Preston 285–292

Analysis of intrastrain recombination in herpes simplex virus type 1 strain 17 and herpes simplex virus type 2 strain HG52 using restriction endonuclease sites as unselected markers and temperature-sensitive lesions as selected markers

S. M. Brown, J. H. Subak-Sharpe, J. Harland and A. R. MacLean 293–301

The UL13 virion protein of herpes simplex virus type 1 is phosphorylated by a novel virus-induced protein kinase

Herpes simplex virus type 1 origin-dependent DNA replication in insect cells using recombinant baculoviruses

N. D. Stow 313–321

The myxoma virus thymidine kinase gene: sequence and transcriptional mapping

R. J. Jackson and H. G. Bults 323–328

Identification of two biologically distinct strains of transmissible mink encephalopathy in hamsters

R. A. Bessen and R. F. Marsh 329–334

Comparison of rabies virus G proteins produced by cDNA-transfected animal cells that display either inducible or constitutive expression of the gene

K. Morimoto, A. Kawai and K. Mifune 335–345

Sequence analysis of the Marburg virus nucleoprotein gene: comparison to Ebola virus and other non-segmented negative-strand RNA viruses

Construction of vaccinia virus recombinants expressing several measles virus proteins and analysis of their efficacy in vaccination of mice

Canine parvovirus empty capsids produced by expression in a baculovirus vector: use in analysis of viral properties and immunization of dogs

Protection of mice from lethal influenza by defective interfering virus: T cell responses

L. McLain, D. J. Morgan and N. J. Dimmock 375–381

Human influenza A (H1N2) viruses isolated from China

Y. Guo, X. Xu and N. J. Cox 383–387

Characterization of Bunyamwera virus defective interfering particles

A. H. Patel and R. M. Elliott 389–396

The effect of ciclooxolone sodium on the replication of vesicular stomatitis virus in BSC-1 cells
