REVIEW ARTICLE

Baculovirus structural proteins

G. F. Rohrmann

PLANT

Electrotransfection of protoplasts from tomato, wild tomato, barley and chrysanthemum with tobacco mosaic virus RNA

R. Matsunaga, K. Sawamura, M. De Kok, T. Makino, K. Miki, M. Kojima, T. Tsuchizaki and T. Hibi

Analysis of the dsRNAs of apple chlorotic leaf spot virus

S. German, T. Candresse, O. Le Gall, M. Lanneau and J. Dunez

Autocatalytic activity of the tobacco etch virus NIa proteinase in viral and foreign protein sequences

K. Rorrer, T. D. Parks, B. Scheffler, M. Bevan and W. G. Dougherty

Conserved terminal sequences of rice ragged stunt virus genomic RNA

J. Yan, H. Kudo, I. Uyeda, S.-Y. Lee and E. Shikata

ANIMAL

Characterization of primary human fibroblasts transformed by human papilloma virus type 16 and herpes simplex virus type 2 DNA sequences

Glycoprotein 60 of equine herpesvirus type 1 is a homologue of herpes simplex virus glycoprotein D and plays a major role in penetration of cells

Immunity in strain 2 guinea-pigs inoculated with vaccinia virus recombinants expressing varicella-zoster virus glycoproteins I, IV, V or the protein product of the immediate early gene 62

P. W. Lowry, S. Solem, B. N. Watson, C. M. Koropchak, H. M. Thackray, P. R. Kinchington, W. T. Ruyechan, P. Ling, J. Hay and A. M. Arvin

The different interactions of a gIII mutant of pseudorabies virus with several different cell types

L. Zsak, N. Sugg and T. Ben-Porat

Cloning and sequencing of Puumala virus Sotkamo strain S and M RNA segments: evidence for strain variation in hantaviruses and expression of the nucleocapsid protein

O. Vapalahti, H. Kallio-Kokko, E.-M. Salonen, M. Brummer-Korvenkontio and A. Vaheri

Secretion of fowl plague virus haemagglutinin from insect cells requires elimination of both hydrophobic domains

E. Kretzschmar, M. Veit, S. Brunschön, K. Kuroda and H.-D. Klenk

Oligomerization and post-translational processing of glycoprotein G of human respiratory syncytial virus: altered O-glycosylation in the presence of brefeldin A

P. L. Collins and G. Mottet

Assignment of mutant tsN19 (complementation group E) of respiratory syncytial virus to the P protein gene

C. Caravokyri, A. J. Zajac and C. R. Pringle

Assignment of mutant tsN19 (complementation group E) of respiratory syncytial virus to the P protein gene

C. Caravokyri, A. J. Zajac and C. R. Pringle

Assignment of mutant tsN19 (complementation group E) of respiratory syncytial virus to the P protein gene

C. Caravokyri, A. J. Zajac and C. R. Pringle
Antigenic diversity of human parainfluenza virus type 1 isolates and their immunological relationship with Sendai virus revealed by using monoclonal antibodies

Sequence analysis of the genes encoding the nucleocapsid protein and phosphoprotein (P) of phocid distemper virus, and editing of the P gene transcript

M. Blixenkrone-Møller, B. Sharma, T. M. Varsanyi, A. Hu, E. Norrby and J. Kövamees

Basis of neurovirulence of avirulent rabies virus variant Av01 with stereotaxic brain inoculation in mice

C. Yang and A. C. Jackson

Bovine coronavirus uses N-acetyl-9-O-acetylmuraminic acid as a receptor determinant to initiate the infection of cultured cells

B. Schultze and G. Herrler

Localization of group-specific epitopes on the major capsid protein of group A rotavirus

Characterization of the genes encoding two of the major capsid proteins of epizootic haemorrhagic disease virus indicates a close genetic relationship to bluetongue virus

H. Iwata, T. Chuma and P. Roy

Expression of the major core antigen VP7 of African horsesickness virus by a recombinant baculovirus and its use as a group-specific diagnostic reagent

Lack of human immunodeficiency virus type 1 (HIV-1) replication and accumulation of viral DNA in HIV-1-infected T cells blocked in cell replication

S. Tang, L. Poulin and J. A. Levy

Recombinant interleukin 4 stimulates human immunodeficiency virus production by infected monocytes and macrophages

Murine monoclonal antibodies directed against the transmembrane protein gp41 of human immunodeficiency virus type 1 enhance its infectivity

De novo reverse transcription is a crucial event in cell-to-cell transmission of human immunodeficiency virus

P. Li, L. J. Kuiper, A. J. Stephenson and C. J. Burrell

Detection of adeno-associated virus type 2 in human peripheral blood cells

Peripheral replication and latency reactivation kinetics of the non-neurovirulent herpes simplex virus type 1 variant 1716

L. M. Robertson, A. R. MacLean and S. M. Brown

Status of the ICP34.5 gene in herpes simplex virus type 1 strain 17

A. Dolan, E. McKie, A. R. MacLean and D. J. McGeoch

Relationship between HOX2 homeobox gene expression and the human cytomegalovirus immediate early genes

C. Kadota, M. Nagahama and Y. Tsutsui

The amino terminus of human cytomegalovirus glycoprotein B contains epitopes that vary among strains

N. Basgoz, I. Qadri, D. Navarro, A. Sears, E. Lennette, J. Younghblom and L. Pereira
Vaccinia virus encodes four putative DNA and/or RNA helicases distantly related to each other

Low pH deforms the influenza virus envelope

Bovine respiratory syncytial virus nucleocapsid protein: mRNA sequence analysis and expression from recombinant vaccinia virus vectors

Sequence analysis of the large (L) protein of simian virus 5

Nucleocapsid gene sequence of a North American isolate of viral haemorrhagic septicaemia virus, a fish rhabdovirus

Follow-up of hepatitis C virus infection in chimpanzees: determination of viraemia and specific humoral immune response

Characterization of a new picorna-like virus, himetobi P virus, in planthoppers

Further analysis of nucleic acids in purified scrapie prion preparations by improved return refocusing gel electrophoresis
