REVIEW ARTICLE

The closteroviruses, capilloviruses and other similar viruses: a short review

R. S. Coffin and R. H. A. Coutts

PLANT

A strong-stop DNA in rice plants infected with rice tungro bacilliform virus

Y. Bao and R. Hull

Sequence and structure of defective interfering RNAs associated with cucumber necrosis virus infections

R. L. Finnen and D. M. Rochon

The involvement of cowpea mosaic virus M RNA-encoded proteins in tubule formation

D. Kasteel, J. Wellink, J. Verver, J. van Lent, R. Goldbach and A. van Kammen

ANIMAL

Involvement of cellular adhesion sequences in the attachment of adenovirus to the HeLa cell surface

M.-T. Belin and P. Boulanger

Human polyomavirus JC promoter/enhancer rearrangement patterns from progressive multifocal leukoencephalopathy brain are unique derivatives of a single archetypal structure

G. S. Ault and G. L. Stoner

Antigenic differences between the major glycoproteins of bovine herpesvirus type 1.1 and bovine encephalitis herpesvirus type 1.3

The effects of lithium and potassium on macromolecular synthesis in herpes simplex virus-infected cells

C. E. Hartley, A. Buchan, S. Randall, G. R. B. Skinner, M. Osborne and L. M. Tomkins

Restricted replication of respiratory syncytial virus in human alveolar macrophages

Structural and functional studies on a unique linear neutralizing antigenic site (G5) of the rabies virus glycoprotein

Identification of a fifth neutralizable site on type O foot-and-mouth disease virus following characterization of single and quintuple monoclonal antibody escape mutants

Morphological and genomic characterization of two reoviruses (P and W2) pathogenic for marine crustaceans; do they constitute a novel genus of the Reoviridae family?

The genetic basis for the antigenicity of the VP2 protein of the infectious bursal disease virus

The AP-1 binding site in the feline immunodeficiency virus long terminal repeat is not required for virus replication in feline T lymphocytes

Identification of cellular proteins that bind to the human immunodeficiency virus type 1 nef gene product in vitro: a role for myristylation

Characterization of an early gene coding for a highly basic 8.9K protein from the Orgyia pseudotsugata multicapsid nuclear polyhedrosis virus

Replication of Cydia pomonella granulosis virus in cell cultures

Nucleotide sequence of the Buzura suppressaria single nucleocapsid nuclear polyhedrosis virus polyhedrin gene

Characterization of a single SA7-like VA RNA gene in subgroup F adenoviruses

Identification of a new hepatitis B virus (HBV) genotype from Brazil that expresses HBV surface antigen subtype adw4

African swine fever virus thymidylate kinase gene: sequence and transcriptional mapping

Characterization and mapping of simian varicella virus transcripts

Identification of a human cytomegalovirus mutant in the pp150 matrix phosphoprotein gene with a growth-defective phenotype

Inducible expression of a foreign gene inserted into the human cytomegalovirus genome

Lipoplysaccharide inhibits the production of lymphocytic choriomeningitis virus in a human monocyct cell line

Molecular and antigenic characterization of HV114, a hantavirus isolated from a patient with haemorrhagic fever with renal syndrome in China

Construction of an antigenic map of the haemagglutinin–esterase protein of influenza C virus
Location on the evolutionary trees of the non-structural protein (NS) and neuraminidase (NA) genes of late human influenza A (H2N2) viruses: parental viruses of the NS and NA genes of Hong Kong influenza A (H3N2) viruses

Production of the M2 protein of influenza A virus in insect cells is enhanced in the presence of amantadine

Characterization of the gene encoding the A-type inclusion protein of camelpox virus and sequence comparison with other orthopoxviruses

Antiviral effect of short hyperthermic treatment at specific stages of vesicular stomatitis virus replication cycle

Sindbis virus pathogenesis: phenotypic reversion of an attenuated strain to virulence by second-site intragenic suppressor mutations

Subgenomic RNAs of Lelystad virus contain a conserved leader-body junction sequence

St Louis encephalitis virus establishes a productive, cytopathic and persistent infection of Sf9 cells

Nucleotide sequence comparison of the VP8* gene of rotaviruses possessing the AU-1 gene 4 allele

H. Nakao, K. Nakajima and S. Nakajima 1667–1672

H. Meyer and H.-J. Rziha 1679–1684

A. De Marco and M. G. Santoro 1685–1690

R. J. Schoepp and R. E. Johnston 1691–1695

J. J. M. Meulenberg, E. J. de Meijer and R. J. M. Moormann 1697–1701
