BACTERIAL

Structural proteins and DNA characteristics of 14 Listeria typing bacteriophages

M. J. Loessner, I. B. Krause, T. Henle and S. Scherer 701–710

PLANT

Nucleotide sequence of the carlavirus associated with blueberry scorch and similar diseases

Simultaneous regulation of tomato golden mosaic virus coat protein and AL1 gene expression: expression of the AL4 gene may contribute to suppression of the AL1 gene

B. R. Gröning, R. J. Hayes and K. W. Buck 721–726

A stable 463 nucleotide variant of citrus exocortis viroid produced by terminal repeats

ANIMAL

Characterization of the herpes simplex virus type 1 strain 17 neurovirulence gene RLI and its expression in a bacterial system

E. A. McKie, R. G. Hope, S. M. Brown and A. R. MacLean 733–741

Localization of a functional site on herpes simplex virus type 1 glycoprotein C involved in binding to cell surface heparan sulphate

Binding and repression of the latency-associated promoter of herpes simplex virus by the immediate early 175K protein

A. H. Batchelor, K. W. Wilcox and P. O’Hare 753–767

Precipitation of the Epstein–Barr virus protein EBNA 2 by an EBNA 3c-specific monoclonal antibody

M. J. Maunders, L. Petti and M. Rowe 769–778

Tumour necrosis factor-α production during cytomegalovirus infection in immunosuppressed rats

B. L. Haagmans, A. J. M. van den Eertwegh, E. Claassen, M. C. Horzinek and V. E. C. J. Schijns 779–787

Characterization of the 55K adenovirus type 5 E1B product and related proteins

D. Takayesu, J. G. Teodoro, S. G. Whalen and P. E. Branton 789–798

Cytotoxic T lymphocytes raised against Japanese encephalitis virus: effector cell phenotype, target specificity and in vitro virus clearance

K. Murali-Krishna, V. Ravi and R. Manjunath 799–807
The nucleoprotein of Marburg virus is phosphorylated

Reversal of the measles virus-mediated increase of phosphorylating activity in persistently infected mouse neuroblastoma cells by anti-measles virus antibodies

Identification and characterization of the ecdysteroid UDP-glucosyltransferase gene of the *Lymantria dispar* multinucleocapsid nuclear polyhedrosis virus

Analysis of the human immunodeficiency virus type 1 envelope protein interaction with the CD4 host cell receptor

Phagocytosis of *Mycobacterium tuberculosis* modulates human immunodeficiency virus replication in human monocytic cells

Correlation between high level gp160 expression and reduced CD4 biosynthesis in clonal derivatives of human immunodeficiency virus type 1-infected U-937 cells

Genomic variation of human immunodeficiency virus type 1 (HIV-1): molecular analyses of HIV-1 in sequential blood samples and various organs obtained at autopsy

Molecular cloning and characterization of a murine AIDS virus-related endogenous transcript expressed in C57BL/6 mice

Monoclonal antibodies to immunodominant and neutralizing domains of the envelope surface protein of feline immunodeficiency virus

Expression of functional protease and subviral particles by vaccinia virus containing equine infectious anaemia virus *gag* and *5' pol* genes

Expression of bovine herpesvirus 1 glycoprotein gIII by a recombinant baculovirus in insect cells

Transcriptional analysis and genome expression of chicken anaemia virus

Sequence variation in the capsid protein genes of human papillomavirus type 16

Effect of frameshift mutation in the pre-C region of hepatitis B virus on the X and C genes

Determination of the 5' end of the lactate dehydrogenase-elevating virus genome by two independent approaches

Hepatitis C virus variants from Nepal with novel genotypes and their classification into the third major group

Common distribution of antigenic determinants and complementation activity on matrix proteins of two vesicular stomatitis virus serotypes
Role of virion M2 protein in influenza virus uncoating: specific reduction in the rate of membrane fusion between virus and liposomes by amantadine

S. A. Wharton, R. B. Belshe, J. J. Skehel and A. J. Hay

945–948

CORRIGENDUM

New observations on antigenic diversification of RNA viruses. Antigenic variation is not dependent on immune selection

E. Domingo, J. Díez, M. A. Martínez, J. Hernández, A. Holguín, B. Borrego and M. G. Mateu

949
