REVIEW ARTICLE

Structure and function of the rotavirus RNA-binding proteins
J. T. Patton 2633–2644

PLANT

Pseudorecombination and complementation between potato yellow mosaic geminivirus and tomato golden mosaic geminivirus
Y. K. Sung and R. H. A. Coutts 2809–2815

Characterization of cocksfoot mottle sobemovirus genomic RNA and sequence comparison with related viruses

Inhibition of brome mosaic virus (BMV) amplification in protoplasts from transgenic tobacco plants expressing replicable BMV RNAs
M. Kaido, M. Mori, K. Mise, T. Okuno and I. Furusawa 2827–2833

Sequence analysis of pothos latent virus genomic RNA
L. Rubino, M. Russo and G. P. Martelli 2835–2839

The nucleotide sequence of cowpea mottle virus and its assignment to the genus Carmovirus
X. J. You, J. W. Kim, G. W. Stuart and R. F. Bozarth 2841–2845

Sequence of RNA 2 of a nematode-transmissible isolate of tobacco rattle virus
C. Hernández, A. Mathis, D. J. F. Brown and J. F. Bol 2847–2851

Expression of the turnip yellow mosaic virus proteinase in Escherichia coli and determination of the cleavage site within the 206 kDa protein
G. Kadaré, M. Rozanov and A.-L. Haenni 2853–2857

Infectivity of algal viruses studied by chlorophyll fluorescence
J. Rohozinski, P. N. Patil and G. G. R. Seaton 2859–2862

ANIMAL

A new genome type of human parvovirus B19 present in sera of patients with encephalopathy
K. Umene and T. Nunoue 2645–2651

Differential induction and regulation of c-jun, junB, junD and c-fos by human papillomavirus type 11 E5a oncoprotein

Conformational and linear epitopes on virus-like particles of human papillomavirus type 33 identified by monoclonal antibodies to the minor capsid protein L2

Varicella-zoster virus induces apoptosis in cell culture

C. Sadzot-Delvaux, P. Thonard, S. Schoonbroodt, J. Piette and B. Rentier

2875–2879

Pseudorabies virus early protein 0 transactivates the viral gene promoters

S. Watanabe, E. Ono, Y. Shimizu and H. Kida

2881–2885

Disruption of PML-associated nuclear bodies during human cytomegalovirus infection

C. Kelly, R. Van Driel and G. W. G. Wilkinson

2887–2893

DNA sequence and transcriptional analysis of the glycoprotein M gene of murine cytomegalovirus

A. A. Scalzo, C. A. Forbes, N. J. Davis-Poynter, H. E. Farrell and P. A. Lyons

2895–2901

Structure and properties of a herpesvirus of turkeys recombinant in which US1, US10 and SORF3 genes have been replaced by a lacZ expression cassette

V. Zelnik, P. Tyers, G. D. Smith, C. Jiang and N. L. J. Ross

2903–2907

Mutations in the human papillomavirus type 16 E2 protein identify multiple regions of the protein involved in binding to E1

A. Piccini, A. Storey, P. Massimi and L. Banks

2909–2913
