The Journal of General Virology

Volume 77  Part 5  May 1996

INSECT

Baculovirus infection of Spodoptera exigua larvae: lacZ expression driven by promoters of early genes pe38 and me53 in larval tissue

The DNA polymerase and helicase genes of a baculovirus of Orgyia pseudotsugata
C. H. Ahrens and G. F. Rohrmann 825–837

An entomopoxvirus homologue of the vaccinia virus D13L-encoded 'rifampicin resistance' protein

PLANT

Variation in the genome of rice tungro bacilliform virus: molecular characterization of six isolates
Z. Fan, G. Dahal, I. Dasgupta, J. Hay and R. Hull 847–854

Features on the surface of the tobacco rattle tobravirus particle that are antigenic and sensitive to proteolytic digestion
F. J. Legorburu, D. J. Robinson and L. Torrance 855–859

Loss of potyvirus transmissibility and helper-component activity correlate with non-retention of virions in aphid stylets

Nucleic acid-binding properties of a bacterialY expressed potato virus Y helper component-proteinase
I. G. Maia and F. Bernardi 869–877

RNA-binding activities of barley stripe mosaic virus \gamma\beta fusion proteins
R. G. K. Donald and A. O. Jackson 879–888

Beet necrotic yellow vein virus 42 kDa triple gene block protein binds nucleic acid in vitro
C. Bleykasten, D. Gilmer, H. Guilley, K. E. Richards and G. Jonard 889–897

ANIMAL

DNA viruses

Molecular characterization of newly recognized rodent paroviruses

Sensitivity to the parovirus minute virus of mice as a probe for azatyrosine-mediated phenotypic reversion of spontaneously transformed cells
C. E. Koering, M. Vennin-Fikry, T. Dupressoir, J. R. Schlehofer, J. Rommelaeere and D. Stehelin 913–917

Geographical distribution of the human polyomavirus JC virus types A and B and isolation of a new type from Ghana
**In vivo** selection of a hepatitis B virus mutant with abnormal viral protein expression

Characterization of the African swine fever virion protein j18L

DNA sequence variation as a clue to the phylogenesis of orthopoxviruses

Cytolytic activity and associated serine protease expression by skin and afferent lymph CD8+ T cells during orf virus reinfection

Expression of bacteriophage T7 RNA polymerase in avian and mammalian cells by a recombinant fowlpox virus

Characterization of a binding site for the herpes simplex virus type 1 UL9 origin-binding protein within the UL9 gene

Immune cell infiltration in corneas of mice with recurrent herpes simplex virus disease

Cell-mediated immunity to pseudorabies virus: cytolysic effector cells with characteristics of lymphokine-activated killer cells lyse virus-infected and glycoprotein gB- and gC-transfected L14 cells

Mutational analysis of the Epstein-Barr virus nuclear antigen 2 by far-Western blotting and DNA-binding studies

**RNA viruses**

The non-structural proteins of bluetongue virus are a dominant source of cytotoxic T cell peptide determinants

Polyclonal B lymphocyte activation induced by mouse hepatitis virus A59 infection

A protective anti-peptide antibody against the immunodominant site of the A24 Cruzeiro strain of foot-and-mouth disease virus and its reactivity with other subtype viruses containing the same minimum binding sequence

Mapping the domains on the phosphoprotein of bovine respiratory syncytial virus required for N–P interaction using a two-hybrid system

Inhibition of the influenza virus RNA-dependent RNA polymerase by antisera directed against the carboxy-terminal region of the PB2 subunit

Characterization and complete genome sequences of high- and low-virulence variants of tick-borne encephalitis virus

D. Kremsdorf, F. Garreau, F. Capel, M.-A. Petit and C. Brechot

H. Sun, J. Jenson, L. K. Dixon and R. M. E. Parkhouse

N. J. Douglass and K. R. Dumbell

D. McK, Haig, G. Hutchison, J. Thomson, D. Yirrell and H. W. Reed

O. Hammarsten, P. Elias and N. D. Stow

L. D. Jones, T. Chuma, R. Hails, T. Williams and P. Roy

V. Lardans, C. Godfraind, J. T. M. van der Logt, F. W. A. Heessen, M.-D. Gonzalez and J.-P. Coutelier

S. K. Mallipeddi, B. Lupiani and S. K. Samal

V. Blok, C. Cianci, K. W. Tibbles, S. C. Inglis, M. Krystal and P. Digard

G. Wallner, C. W. Mandl, M. Ecker, H. Holzmann, K. Stiasny, C. Kunz and F. X. Heinz
Cultivation of hepatitis C virus in primary hepatocyte culture from patients with chronic hepatitis C results in release of high titre infectious virus

Processing of the E1 glycoprotein of hepatitis C virus expressed in mammalian cells

A central hydrophobic domain of the hepatitis C virus NS4A protein is necessary and sufficient for the activation of the NS3 protease

Concurrent evolution of regions of the envelope and polymerase genes of human immunodeficiency virus type 1 observed during zidovudine (AZT) therapy

An additional mechanism of growth restriction in T cell line H9 of human immunodeficiency virus type 1 isolates from asymptomatic homosexual men

The presence of a divergent T-lymphotropic virus in a wild-caught pygmy chimpanzee (Pan paniscus) supports an African origin for the human T-lymphotropic/simian T-lymphotropic group of viruses

Expression of novel transposon-containing mRNAs in human T cells

T. Ito, J. Mukaigawa, J. Zuo, Y. Hirabayashi, K. Mitamura and K. Yasui

A. Fournillier-Jacob, A. Cahour, N. Escriou, M. Girard and C. Wychowski

L. Tomei, C. Failla, R. L. Vitale, E. Bianchi and R. De Francesco

N. Sheehy, U. Desselberger, H. Whitwell and J. K. Ball

R. Balachandran, M. K. Singh and P. Gupta

C. A. Kelleher, D. A. Wilkinson, J. D. Freeman, D. L. Mager and E. W. Gelfand
