The leading primary journal for vaccine researchers has broken into the electronic age!

Vaccine Online is an exciting electronic enhancement of Vaccine, the pre-eminent publication in the fast-moving field of vaccine research. Find out how you can take advantage of:

- Fast, desktop access to fully searchable articles - available weeks in advance of the print version
- Hypertext-linked references - allowing you to jump straight into abstracts (if covered by EMBASE®)
- Personalized search profiles
- Sophisticated navigation tools - using OCLC’s Guidon® Software and soon to be available on the WWW
- Facilitated e-mail - allowing instant contact with the editorial team
- News items
- Coming soon - WWW version!
