Author Index for this issue

**JGV DIRECT**

An RNA aptamer that distinguishes between closely related human influenza viruses and inhibits haemagglutinin-mediated membrane fusion

**ANIMAL**

DNA viruses
Abnormal immune response of CCR5-deficient mice to ocular infection with herpes simplex virus type 1
D. J. J. Carr, J. Ash, T. E. Lane and W. A. Kuziel 489–499

Human herpesvirus 7 U47 gene products are glycoproteins expressed in virions and associate with glycoprotein H
T. Sadaoka, K. Yamanishi and Y. Mori 501–508

Cloning of the genome of *Alcelaphine herpesvirus 1* as an infectious and pathogenic bacterial artificial chromosome

Identifying cellular genes crucial for the reactivation of Kaposi’s sarcoma-associated herpesvirus latency
B. A. Bryan, O. F. Dyson and S. M. Akula 519–529

Dual mutations in the Autographa californica nucleopolyhedrovirus FP-25 and p35 genes result in plasma-membrane blebbing in *Trichoplusia ni* cells

Genome sequence of an enhancin gene-rich nucleopolyhedrovirus (NPV) from *Agrotis segetum*: collinearity with *Spodoptera exigua* multiple NPV

Relaxed template specificity in fowl adenovirus 1 DNA replication initiation

RNA viruses
Role of myristoylation and N-terminal basic residues in membrane association of the human immunodeficiency virus type 1 Nef protein
M. Bentham, S. Mazaleyrat and M. Harris 563–571

Genetic diversity of small-ruminant lentiviruses: characterization of Norwegian isolates of *Caprine arthritis encephalitis virus*

Comparative studies on mucosal and intravenous transmission of simian immunodeficiency virus (SIVsm): evolution of coreceptor use varies with pathogenic outcome

Front cover illustration
Three-dimensional model of the poliovirus oriR obtained by the molecular dynamics simulation. A top-view stick diagram display is shown highlighting the kissing interaction in green. Image courtesy Willem J. G. Melchers, Radboud University Medical Center Nijmegen, The Netherlands. See the paper by van Ooij et al. in this issue, pp. 689–695.
Comparative studies on mucosal and intravenous transmission of simian immunodeficiency virus (SIVsm): the kinetics of evolution to neutralization resistance are related to progression rate of disease

A. Laurén, R. Thorstensson and E. M. Fenyo

595–606

CCR5 use by human immunodeficiency virus type 1 is associated closely with the gp120 V3 loop N-linked glycosylation site

P. Clevestig, L. Pramanik, T. Leitner and A. Ehrnst

607–612

The glycosylation site in the envelope protein of West Nile virus (Sarafend) plays an important role in replication and maturation processes

J. Li, R. Bhuvanakantham, J. Howe and M.-L. Ng

613–622

Efficient cleavage by signal peptide peptidase requires residues within the signal peptide between the core and E1 proteins of hepatitis C virus strain J1

R. G. Hope, M. J. McElwee and J. McLauchlan

623–627

Hepatitis C virus complete genome sequences identified from China representing subtypes 6k and 6n and a novel, as yet unassigned subtype within genotype 6

L. Lu, T. Nakano, C. Li, Y. Fu, S. Miller, C. Kuiken, B. H. Robertson and C. H. Hagedorn

629–634

Tagging of NS5A expressed from a functional hepatitis C virus replicon

C. J. McCormick, S. Maucourant, S. Griffin, D. J. Rowlands and M. Harris

635–640

Comparative evaluation of two severe acute respiratory syndrome (SARS) vaccine candidates in mice challenged with SARS coronavirus

641–650

Identification of protease and ADP-ribose 1'0-monophosphatase activities associated with transmissible gastroenteritis virus non-structural protein 3

Á. Putics, A. E. Gorbalenya and J. Ziebuhr

651–656

Role of a conserved tripeptide in the endodomain of Sindbis virus glycoprotein E2 in virus assembly and function

J. West and D. T. Brown

657–664

Transcribing paramyxovirus RNA polymerase engages the template at its 3' extremity

S. Cordey and L. Roux

665–672

Role of non-raft cholesterol in lymphocytic choriomeningitis virus infection via z-dystroglycan

W. A. Shah, H. Peng and S. Carbonetto

673–678

A new promoter-binding site in the PB1 subunit of the influenza A virus polymerase

T. E. Jung and G. G. Brownlee

679–688

Structural and functional integrity of the coxsackievirus B3 oriR: spacing between coaxial RNA helices

689–695

Putative neutralization epitopes and broad cross-genotype neutralization of Hepatitis E virus confirmed by a quantitative cell-culture assay

S. U. Emerson, P. Clemente-Casares, N. Moiduddin, V. A. Arankalle, U. Torian and R. H. Purcell

697–704
PLANT VIRUSES

Cytological analysis of Saccharomyces cerevisiae cells supporting cymbidium ringspot virus defective interfering RNA replication

B. Navarro, M. Russo, V. Pantaleo and L. Rubino 705–714

Essential role of the Box II cis element and cognate host factors in regulating the promoter of Rice tungro bacilliform virus

OTHER VIRUSES

Complete nucleotide sequence and genome organization of a single-stranded RNA virus infecting the marine fungoid protist Schizochytrium sp.

Y. Takao, K. Mise, K. Nagasaki, T. Okuno and D. Honda 723–733
