Author Index for this issue (v)–(vi)

ANIMAL

**DNA viruses**

Beta interferon plus gamma interferon efficiently reduces acyclovir-resistant herpes simplex virus infection in mice in a T-cell-independent manner

591–598

Analysis of latent viral gene expression in natural and experimental latency models of human cytomegalovirus and its correlation with histone modifications at a latent promoter

M. B. Reeves and J. H. Sinclair

599–604

Sequences of complete human cytomegalovirus genomes from infected cell cultures and clinical specimens

605–615

Deletion of the rat cytomegalovirus immediate-early 1 gene results in a virus capable of establishing latency, but with lower levels of acute virus replication and latency that compromise reactivation efficiency

616–621

Regulation of the Epstein–Barr virus Zp promoter in B lymphocytes during reactivation from latency

C. McDonald, C. Elgoueta Karstegl, P. Kellam and P. J. Farrell

622–629

Lymphocryptovirus phylogeny and the origins of Epstein–Barr virus

B. Ehlers, K. Spieß, F. Leendertz, M. Peeters, C. Boesch, D. Gatherer and D. J. McGeoch

630–642

Production, characterization and in vitro testing of HBcAg-specific VH4 intrabodies

B. Serruys, F. Van Houtte, A. Farhoudi-Moghadam, G. Leroux-Roels and P. Vanlandschoot

643–652

Characterization of novel polyomaviruses from Bornean and Sumatran orang-utans

M. J. Groenewoud, Z. Fagrouch, S. van Gessel, H. Niphuis, A. Bulavaite, K. S. Warren, J. L. Heeney and E. J. Verschoor

653–658

Identification of protein–protein interactions of the occlusion-derived virus-associated proteins of Helicoverpa armigera nucleopolyhedrovirus

659–670

Front cover illustration

Immunohistochemical detection of European bat lyssavirus type 1a antigen in epithelial cells and cells in the lamina propria in a taste bud of a rabid bat (lower), and lingual papilla containing a normal taste bud from a non-rabid bat (upper). Images courtesy of A. Nuñez, Veterinary Laboratories Agency (VLA), Weybridge, UK. See the paper by Freuling et al. in the October 2009 issue of J Gen Virol, vol. 90, part 10, pp. 2493–2502.
RNA viruses

Hepatitis C virus RNA replication is regulated by Ras–Erk signalling
S. Gretton, M. Hughes and M. Harris 671–680

Activation of transcription factor Nrf2 by hepatitis C virus induces the cell-survival pathway
D. Burdette, M. Olivarez and G. Waris 681–690

Molecular evidence of horizontal transmission of hepatitis C virus within couples

Levels of soluble ST2 in serum associated with severity of dengue due to tumour necrosis factor alpha stimulation
N. Houghton-Triviño, D. M. Salgado, J. A. Rodriguez, I. Bosch and J. E. Castellanos 697–706

Evolution, dispersal and replacement of American genotype dengue type 2 viruses in India (1956–2005): selection pressure and molecular clock analyses

The classical swine fever virus Npro product is degraded by cellular proteasomes in a manner that does not require interaction with interferon regulatory factor 3
J. Seago, S. Goodbourn and B. Charleston 721–726

Molecular evolution of GB virus B hepatitis virus during acute resolving and persistent infections in experimentally infected tamarins
S. Takikawa, R. E. Engle, K. N. Faulk, S. U. Emerson, R. H. Purcell and J. Bukh 727–733

Detection of norovirus-, sapovirus- and rhesus enteric calicivirus-specific antibodies in captive juvenile macaques
T. Farkas, J. Dufour, X. Jiang and K. Sestak 734–738

Feline calicivirus p32, p39 and p30 proteins localize to the endoplasmic reticulum to initiate replication complex formation

Detection of a novel hepatitis E-like virus in faeces of wild rats using a nested broad-spectrum RT-PCR

A history estimate and evolutionary analysis of rabies virus variants in China

Combined chloroquine and ribavirin treatment does not prevent death in a hamster model of Nipah and Hendra virus infection
A. N. Freiberg, M. N. Worthy, B. Lee and M. R. Holbrook 765–772

Small intestine CD4+ cell reduction and enteropathy in simian/human immunodeficiency virus KS661-infected rhesus macaques in the presence of low viral load

PLANT

Structural homology between bamboo mosaic virus and its satellite RNAs in the 5’ untranslated region
S.-C. Chen, A. Desprez and R. C. L. Olsthoorn 782–787
Evolutionary trajectory of turnip mosaic virus populations adapting to a new host
K. Ohshima, S. Akaishi, H. Kajiyama, R. Koga and A. J. Gibbs 788–801

Transcriptomic analysis of intestinal genes following acquisition of pea enation mosaic virus by the pea aphid Acyrthosiphon pisum

OTHER AGENTS

Mouse vaccination with dendritic cells loaded with prion protein peptides overcomes tolerance and delays scrapie
