REVIEWS

The GB viruses: a review and proposed classification of GBV-A, GBV-C (HGV), and GBV-D in genus Pegivirus within the family Flaviviridae
J. T. Stapleton, S. Founa, A. S. Muerhoff, J. Bukh and P. Simmonds 233–246

Human immunodeficiency virus type 1 long-term non-progressors: the viral, genetic and immunological basis for disease non-progression
K. Poropatich and D. J. Sullivan, Jr 247–268

ANIMAL RNA viruses

A PSAP motif in the ORF3 protein of hepatitis E virus is necessary for virion release from infected cells

Recombination in hepatitis C virus genotype 1 evaluated by phylogenetic and population-genetic methods
T. H. M. Mes and G. J. J. van Doornum 279–286

Adaptive mutations in the genomes of enterovirus 71 strains following infection of mouse cells expressing human P-selectin glycoprotein ligand-1

Lipopolysaccharide stress induces cell-type specific production of murine leukemia virus type-endogenous retroviral virions in primary lymphoid cells

Antiserum against the conserved nine-amino-acid N-terminal peptide of influenza A virus matrix protein 2 is not immunoprotective

Intra-host diversities of the receptor-binding domain of stork faeces-derived avian H5N1 viruses and its significance as predicted by molecular dynamic simulation

Requirement for Siva-1 for replication of influenza A virus through apoptosis induction
T. Shiozaki, A. Iwai, Y. Kawaoka, A. Takada, H. Kida and T. Miyazaki 315–325

Localization of epitopes recognized by monoclonal antibodies that neutralized the H3N2 influenza viruses in man

Front cover illustration

Spherical particles obtained by tobacco mosaic virus heating and used as nanoplatforms for foreign epitope binding. Image courtesy of Dr Nikolai Nikitin, Department of Virology, Lomonosov Moscow State University, 11991 Moscow, Russia. See the paper by Atabekov et al in this issue, pp. 453–456.
Passaging of a Newcastle disease virus pigeon variant in chickens results in selection of viruses with mutations in the polymerase complex enhancing virus replication and virulence

A single polymerase (L) mutation in avian metapneumovirus increased virulence and partially maintained virus viability at an elevated temperature

Influence of insertion site of the avian influenza virus haemagglutinin (HA) gene within the Newcastle disease virus genome on HA expression

Whole-genome characterization of human group C rotaviruses: identification of two lineages in the VP3 gene

Horizontal transmission of deformed wing virus: pathological consequences in adult bees (Apis mellifera) depend on the transmission route

N. Möckel, S. Gisder and E. Genersch 370–377

DNA viruses

Bovine papillomavirus E7 oncoprotein binds to p600 in naturally occurring equine sarcoïds

A. Corteggio, O. Di Geronimo, S. Roperto, F. Roperto and G. Borzacchiello 378–382

Serological markers for papillomavirus infection and skin tumour development in the rodent model Mastomys coucha

Upregulation of lipocalin-2 in human papillomavirus-positive keratinocytes and cutaneous squamous cell carcinomas

B. Akgül, B. Bauer, P. Zigrino, A. Storey, C. Mauch and H. Pfister 395–401

A complex hepatitis B virus (X/C) recombinant is common in Long An county, Guangxi and may have originated in southern China

Molecular characterization of adenovirus from clinical samples through analysis of the hexon and fiber genes

G. La Rosa, M. Iaconelli, M. Pourshaban, E. Luca, P. Valentini, S. Sica, S. Manzara, G. Delogu and M. Muscillo 412–420

X-box binding protein 1 induces the expression of the lytic cycle transactivator of Kaposi’s sarcoma-associated herpesvirus but not Epstein–Barr virus in co-infected primary effusion lymphoma

African swine fever viruses with two different genotypes, both of which occur in domestic pigs, are associated with ticks and adult warthogs, respectively, at a single geographical site

PLANT

Protein–RNA linkage and post-translational modifications of two sobemovirus VPgs

A. Olspert, L. Peil, E. Hébrard, D. Fargette and E. Truve 445–452

Thermal transition of native tobacco mosaic virus and RNA-free viral proteins into spherical nanoparticles

J. Atabekov, N. Nikitin, M. Arkhipenko, S. Chirkov and O. Karpova 453–456

Use of randomly mutagenized genomic cDNA banks of potato spindle tuber viroid to screen for viable versions of the viroid genome

A. Więsyk, T. Candresse, W. Zagórski and A. Góra-Sochacka 457–466
BSE infectivity in the absence of detectable PrP\textsuperscript{Sc} accumulation in the tongue and nasal mucosa of terminally diseased cattle
A. Balkema-Buschmann, M. Eiden, C. Hoffmann, M. Kaatz, U. Ziegler, M. Keller and M. H. Groschup
467–476
