Author Index for this issue (v)–(vi)

ANIMAL

**DNA viruses**

Generation of neutralizing aptamers against herpes simplex virus type 2: potential components of multivalent microbicides

Genotypic characterization of two bacterial artificial chromosome clones derived from a single DNA source of the very virulent gallid herpesvirus-2 strain C12/130

S. J. Spatz, L. P. Smith, S. J. Baigent, L. Petherbridge and V. Nair

Characterization of specific antibodies against cytomegalovirus (CMV)-encoded interleukin 10 produced by 28 % of CMV-seropositive blood donors

C. de Lemos Rieper, P. Galle, B. K. Pedersen and M. B. Hansen

Recruitment of cyclin-dependent kinase 9 to nuclear compartments during cytomegalovirus late replication: importance of an interaction between viral pUL69 and cyclin T1

S. Feichtinger, T. Stamminger, R. Müller, L. Graf, B. Klebl, J. Eickhoff and M. Marschall

Human cytomegalovirus immediate-early gene expression is restricted by the nuclear domain 10 component Sp100

M. Adler, N. Tavalai, R. Müller and T. Stamminger

Virally induced changes in cellular microRNAs maintain latency of human cytomegalovirus in CD34⁺ progenitors

E. Poole, S. R. McGregor Dallas, J. Colston, R. S. V. Joseph and J. Sinclair

In vivo function of the murid herpesvirus-4 ribonucleotidereductase small subunit

R. Milho, M. B. Gill, J. S. May, S. Colaco and P. G. Stevenson

The viral ankyrin repeat protein (ORF124L) from infectious spleen and kidney necrosis virus attenuates nuclear factor-κB activation and interacts with IκB kinase β

Characterization of immunostimulatory components of orf virus (parapoxvirus ovis)

Genomic characterization of ten novel cutaneous human papillomaviruses from keratotic lesions of immunosuppressed patients

Front cover illustration

Chlamydiaphage infection of a *Chlamydia abortus* elementary body (diameter 300 nm). Image courtesy of Dr David Longbottom, Moredun Research Institute, Edinburgh, UK. See the paper by Sait *et al.* in this issue, pp. 1733–1737.
RNA viruses

Comparative complete genome analysis of dengue virus type 3 circulating in India between 2003 and 2008
1595–1600

An amino acid substitution (V3I) in the Japanese encephalitis virus NS4A protein increases its virulence in mice, but not its growth rate in vitro
Y. Yamaguchi, Y. Nukui, S. Tajima, R. Nerome, F. Kato, H. Watanabe, T. Takasaki and I. Kurane
1601–1606

Crystal structures of murine norovirus-1 RNA-dependent RNA polymerase
1607–1616

Hepatitis E virus in Italy: molecular analysis of travel-related and autochthonous cases
G. La Rosa, M. Muscillo, V. S. Vennarucci, A. R. Garbuglia, P. La Scala and M. R. Capobianchi
1617–1626

Cellular cap-binding proteins associate with influenza virus mRNAs
K. Bier, A. York and E. Fodor
1627–1634

NS1-mediated delay of type I interferon induction contributes to influenza A virulence in ferrets
I. Meunier and V. von Messling
1635–1644

The nucleoprotein and matrix protein segments of H5N1 influenza viruses are responsible for dominance in embryonated eggs
1645–1649

Influence of PB2 host-range determinants on the intranuclear mobility of the influenza A virus polymerase
Á. Foegelein, E. M. Loucaides, M. Mura, H. M. Wise, W. S. Barclay and P. Digard
1650–1661

Long-term impairment of Streptococcus pneumoniae lung clearance is observed after initial infection with influenza A virus but not human metapneumovirus in mice
H. P. Ludewick, L. Aerts, M.-E. Hamelin and G. Boivin
1662–1665

Effects of N-linked glycosylation of the fusion protein on replication of human metapneumovirus in vitro and in mouse lungs
J. Zhang, Y. Dou, J. Wu, W. She, L. Luo, Y. Zhao, P. Liu and X. Zhao
1666–1675

Genomic and phylogenetic characterization of Leanyer virus, a novel orthobunyavirus isolated in northern Australia
1676–1687

The PI3K/Akt pathway is involved in early infection of some exogenous avian leukosis viruses
S. Feng, W. Cao and M. Liao
1688–1697

High-resolution phylogenetics and phylogeography of human immunodeficiency virus type 1 subtype C epidemic in South America
N. M. C. Véras, R. R. Gray, L. F. de M. Brigido, R. Rodrigues and M. Salemi
1698–1709

DNA-dependent protein kinase interacts functionally with the RNA polymerase II complex recruited at the human immunodeficiency virus (HIV) long terminal repeat and plays an important role in HIV gene expression
S. Tyagi, A. Ochem and M. Tyagi
1710–1720

Sequence similarities of the capsid gene of Chilean and European isolates of infectious pancreatic necrosis virus point towards a common origin
S. Mutoloki and Ø. Evensen
1721–1726
PLANT

A discovery 70 years in the making: characterization of the Rose rosette virus

PHAGE

Identification, sequencing and molecular analysis of Chp4, a novel chlamydiaphage of Chlamydia abortus belonging to the family Microviridae
M. Sait, M. Livingstone, R. Graham, N. F. Inglis, N. Wheelhouse and D. Longbottom 1733–1737

OTHER AGENTS

Characterisation of the effect of heat on agent strains of the transmissible spongiform encephalopathies
R. A. Somerville and N. Gentles 1738–1748
