## Author Index for this issue (v)–(vi)

### Review

The vaccinia virus A56 protein: a multifunctional transmembrane glycoprotein that anchors two secreted viral proteins

**B. C. DeHaven, K. Gupta and S. N. Isaacs**

1971–1980

### ANIMAL

#### DNA viruses

Herpes simplex virus type 2 virion host shutoff protein suppresses innate dsRNA antiviral pathways in human vaginal epithelial cells

**X.-D. Yao and K. L. Rosenthal**

1981–1993

Antigen-presenting cells of haematopoietic origin prime cytomegalovirus-specific CD8 T-cells but are not sufficient for driving memory inflation during viral latency

**C. K. Seckert, S. I. Schader, S. Ebert, D. Thomas, K. Freitag, A. Renzaho, J. Podlech, M. J. Reddehase and R. Holtappels**

1994–2005

H2B homology region of major immediate–early protein 1 is essential for murine cytomegalovirus to disrupt nuclear domain 10, but is not important for viral replication in cell culture

**R. Cosme-Cruz, F. Puerta Martinez, K. J. Perez and Q. Tang**

2006–2019

A mechanistic basis for potent, glycoprotein B-directed gammaherpesvirus neutralization

**D. L. Glauser, A.-S. Kratz, L. Gillet and P. G. Stevenson**

2020–2033

Lack of type-specific concordance between human papillomavirus (HPV) serology and HPV DNA detection in the uterine cervix and oral mucosa

**A. E. Paaso, K. Louvanto, K. J. Syrjänen, T. Waterboer, S. E. Grénman, M. Pawlita and S. M. Syrjänen**

2034–2046

Co-existence of multiple strains of two novel porcine bocaviruses in the same pig, a previously undescribed phenomenon in members of the family Paroviridae, and evidence for inter- and intra-host genetic diversity and recombination

2047–2059

Transcriptomic profiling of Microplitis demolitor bracovirus reveals host, tissue and stage-specific patterns of activity

**K. Bitra, S. Zhang and M. R. Strand**

2060–2071

#### RNA viruses

Modulation of hepatitis C virus replication by iron and hepcidin in Huh7 hepatocytes

**G. Bartolomei, R. E. Cevik and A. Marcello**

2072–2081

### Front cover illustration

Syncytium formation in HeLa cells (with a diameter of 10 μm) mediated by Nipah virus glycoproteins. Image courtesy of Dr Zhengli Shi, State Key Laboratory of Virology, Wuhan Institute of Virology, Chinese Academy of Sciences (CAS), Wuhan, Hubei 430071, People’s Republic of China. See the paper by Yuan et al. in this issue, pp. 2142–2152.
Structural requirements of virion-associated cholesterol for infectivity, buoyant density and apolipoprotein association of hepatitis C virus

Deubiquitination activity associated with hepatitis E virus putative papain-like cysteine protease

Y. A. Karpe and K. S. Lole

The NS1 protein of influenza A virus suppresses interferon-regulated activation of antigen-presentation and immune-proteasome pathways

J. R. Tisoncik, R. Billharz, S. Burmakina, S. E. Belisle, S. C. Proll, M. J. Korth, A. Garcia-Sastre and M. G. Katze

Genetic diversification of H5N1 highly pathogenic avian influenza A virus during replication in wild ducks

Y. Watanabe, M. S. Ibrahim, H. F. Ellakany, H. S. Abd El-Hamid and K. Ikuta

Alleles A and B of non-structural protein 1 of avian influenza A viruses differentially inhibit beta interferon production in human and mink lung cells

M. Munir, S. Zohari, G. Metreveli, C. Baule, S. Belák and M. Berg

Defective interfering influenza A virus protects in vivo against disease caused by a heterologous influenza B virus

P. D. Scott, B. Meng, A. C. Marriott, A. J. Easton and N. J. Dimmock

Determination of a phosphorylation site in Nipah virus nucleoprotein and its involvement in virus transcription

M. Huang, H. Sato, K. Hagiwara, A. Watanabe, A. Sugai, F. Ikeda, H. Kozuka-Hata, M. Oyama, M. Yoneda and C. Kai

Mutations in the G–H loop region of ephrin-B2 can enhance Nipah virus binding and infection

A novel mechanism for the inhibition of interferon regulatory factor-3-dependent gene expression by human respiratory syncytial virus NS1 protein

J. Ren, T. Liu, L. Pang, K. Li, R. P. Garofalo, A. Casola and X. Bao

Tibrogargan and Coastal Plains rhabdoviruses: genomic characterization, evolution of novel genes and seroprevalence in Australian livestock

A. Gubala, S. Davis, R. Weir, L. Melville, C. Cowled and D. Boyle

Molecular diversity and evolutionary history of rabies virus strains circulating in the Balkans

Differential effect of acute and persistent Junin virus infections on the nucleo-cytoplasmic trafficking and expression of heterogeneous nuclear ribonucleoproteins type A and B

RNA helicase retinoic acid-inducible gene I as a sensor of Hantaan virus replication

Specific amino acids of Olive mild mosaic virus coat protein are involved on transmission by Olpidium brassicae

C. Varanda, M. do Rosário Félix, C. M. Soares, S. Oliveira and M. I. Clara 2209–2213

Viroplasm matrix protein Pns9 from rice gall dwarf virus forms an octameric cylindrical structure

The helper component-proteinase of the Zucchini yellow mosaic virus inhibits the Hua Enhancer 1 methyltransferase activity in vitro
