REVIEW

The polio-eradication programme and issues of the end game
P. D. Minor 457–474

ANIMAL

RNA viruses

Echovirus 11 infection induces dramatic changes in the actin cytoskeleton of polarized Caco-2 cells

Foot-and-mouth disease virus epitope dominance in the antibody response of vaccinated animals
M. Mahapatra, P. Hamblin and D. J. Paton 488–493

Infection of human alveolar macrophages by human coronavirus strain 229E

Generation and genetic stability of tick-borne encephalitis virus mutants dependent on processing by the foot-and-mouth disease virus 3C protease
S. Schrauf, M. Kurz, C. Taucher, C. W. Mandl and T. Skern 504–515

Rubella virus-like replicon particles: analysis of encapsidation determinants and non-structural roles of capsid protein in early post-entry replication

A naturally occurring human/hepatitis E recombinant virus predominates in serum but not in faeces of a chronic hepatitis E patient and has a growth advantage in cell culture

Amino acids 473V and 598P of PB1 from an avian-origin influenza A virus contribute to polymerase activity, especially in mammalian cells
C. Xu, W.-B. Hu, K. Xu, Y.-X. He, T.-Y. Wang, Z. Chen, T.-X. Li, J.-H. Liu, P. Buchy and B. Sun 531–540

Reintroduction of H5N1 highly pathogenic avian influenza virus by migratory water birds, causing poultry outbreaks in the 2010–2011 winter season in Japan

Front cover illustration

Profiles of syncytia formation in feline kidney cell line, 8C, expressing wild-type or mutant Tax1 protein by infection of cell-free human T-cell leukemia virus type-I. Numerous syncytium were induced in 8C cells with Tax1 activity. 8C (top), 8C/TaxWT (second), 8C/Tax410 (third) and 8C/TaxM22 cells (bottom). Images courtesy of Dr Takahisa Mori, Department of Virology and Preventive Medicine, Gunma University Graduate School of Medicine, Maebashi, Gunma 371-8511, Japan. See the paper by Mori et al. in this issue, pp. 588–593.
A novel reassortant canine H3N1 influenza virus between pandemic H1N1 and canine H3N2 influenza viruses in Korea

Plasmacytoid dendritic cells and Toll-like receptor 7-dependent signalling promote efficient protection of mice against highly virulent influenza A virus
M. M. Kaminski, A. Ohnemus, M. Cornitescu and P. Staeheli 555–559

Hazara virus infection is lethal for adult type I interferon receptor-knockout mice and may act as a surrogate for infection with the human-pathogenic Crimean–Congo hemorrhagic fever virus

The innate antiviral factor APOBEC3G targets replication of measles, mumps and respiratory syncytial viruses

Multiple genomic sequences of hepatitis delta virus are associated with cDNA promoter activity and RNA double rolling-circle replication

Tax1-expressing feline 8C cells are useful to monitor the life cycle of human T-cell leukemia virus type I

Geographical, genetic and functional diversity of antiretroviral host factor TRIMCyp in cynomolgus macaque (Macaca fascicularis)

Canine ASCT1 and ASCT2 are functional receptors for RD-114 virus in dogs
R. Yoshikawa, J. Yasuda, T. Kobayashi and T. Miyazawa 603–607

Human T-cell leukemia viruses are highly unstable over a wide range of temperatures

**DNA viruses**

Interferon treatment suppresses enteric adenovirus infection in a model gastrointestinal cell-culture system
V. Sherwood, E. King, S. Töttemeyer, I. Connerton and K. H. Mellits 618–623

Biochemical analysis of infected cell polypeptide (ICP)0, ICP4, UL7 and UL23 incorporated into extracellular herpes simplex virus type 1 virions
S. Loret and R. Lippé 624–634

Identification of a novel single-stranded, circular DNA virus from bovine stool

Interactions between hepatitis B virus and aflatoxin B1: effects on p53 induction in HepaRG cells

JC virus promoter/enhancers contain TATA box-associated Spi-B-binding sites that support early viral gene expression in primary astrocytes
Differences in the mechanism of inoculation between a semi-persistent and a non-persistent aphid-transmitted plant virus

Characterization of intracellular localization of PrP Sc in prion-infected cells using a mAb that recognizes the region consisting of aa 119–127 of mouse PrP
