Corrigendum: Death and gastrointestinal bleeding complicate encephalomyelitis in mice with delayed appearance of CNS IgM after intranasal alphavirus infection

Victoria K. Baxter,†‡ 1,2 Elizabeth M. Troisi,† 1 Nathan M. Pate,2 Julia N. Zhao§ and Diane E. Griffin1,*

There was an error on page 10, in the fifth paragraph of the published article.

The sequence provided in the methods for the nsP2 RT-PCR Taqman probe is incorrectly given as the same sequence as the E2 probe.

The correct probe is:

5'-6-carboxyfluorescein (FAM)-CCATTGCCGCCAACTCTCCC-6-carboxytetramethylrhodamine [TAMRA]-3’
