PHYSIOLOGY AND GROWTH
Dehalogenases in Soil Bacteria. By D. J. HARDMAN and J. H. SLATER ................................. 117–128
Involvement of Menaquinone in the Active Accumulation of Aminoglycosides by Bacillus subtilis. By H. W. TABER, B. J. SUGARMAN and G. M. HALFENGER ............................................ 143–149
Surface Tension-like Forces Determine Bacterial Shapes: Streptococcus faecium. By A. L. KOC... 151–161

GENETICS AND MOLECULAR BIOLOGY
Synthesis and Order of Assembly of Spore Coat Proteins in Bacillus subtilis. By H. F. JENKINSON, W. D. SAWYER and J. MANDELSTAM ................................................................. 1–16
Complementation of Sporulation Mutations in Fused Protoplasts of Bacillus subtilis. By B. N. DANCER and J. MANDELSTAM ...................................................................................... 17–26
Dual Control of the gua Operon of Escherichia coli K12 by Adenine and Guanine Nucleotides. By R. K. MEHRA and W. T. DRABBLE ............................................................... 27–37

ECOLOGY
Simulation of the Rat Intestinal Ecosystem using a Two-stage Continuous Culture System. By B. G. VEILLEUX and I. ROWLAND .................................................................................. 103–115

TAXONOMY
Immunodiffusion Studies of Some Nocardia Strains. By M. RIDEELL ...................................... 69–74
Fatty Acids of Fusobacterium Species: Taxonomic Implications. By E. JANTZEN and T. HOFSTAD ............................................................................................................. 163–171

SHORT COMMUNICATIONS
Oxygen Availability and Seasonal Migrations of Ciliated Protozoa in a Freshwater Lake. By B. J. FINLAY ................................................................................................................. 173–178
Glycerol Utilization by Schizosaccharomyces pombe: Dehydrogenation as the Initial Step. By J. W. MAY and J. SLOAN ...................................................................................... 183–185
