VECTORS IN VIRUS BIOLOGY

M.A. Mayo and K.A. Harrap
1984, 200pp., $37.00/£23.50 (UK only), ISBN: 0.12.481480.8

With origins in a meeting of the Society for General Microbiology the volume takes a broad approach. Vector transmission is discussed in terms of the molecular biology, ecology, and epidemiology of the viruses. Mention is made of aphid, nematode, fungal, and leafhopper vectors of plant pathogens, and mosquito and tick vectors of animal viruses.

ADVANCES IN MICROBIAL PHYSIOLOGY

Volume 24
A.H. Rose, J.G. Morris and D.W. Tempest
1983, 364pp., $65.00/£46.50 (UK only), ISBN: 0.12.027724.7

Volume 24 in this indispensable series covers the metabolism of C1 compounds in both yeasts and chemotrophic anaerobes, polyphosphate metabolism in microbes, physiology of acido- and alkophilic bacteria, and the surface stress theory of microbial morphogenesis.
