GENOME UPDATE

Genome update: purine strand bias in 280 bacterial chromosomes
579–583

MINI-REVIEW

From genomes to function: haloarchaea as model organisms
J. Soppa
585–590

BIOCHEMISTRY AND MOLECULAR BIOLOGY

Calcineurin, Mpk1 and Hog1 MAPK pathways independently control fludioxonil antifungal sensitivity in Cryptococcus neoformans
K. Kojima, Y.-S. Bahn and J. Heitman
591–604

Role of anionic phospholipids in the adaptation of Bacillus subtilis to high salinity
C. S. López, A. F. Alice, H. Heras, E. A. Rivas and C. Sánchez-Rivas
605–616

Pectate lyase C from Bacillus subtilis: a novel endo-cleaving enzyme with activity on highly methylated pectin
M. Soriano, P. Diaz and F. I. J. Pastor
617–625

RNA 3’-tail synthesis in Streptomyces: in vitro and in vivo activities of RNase PH, the SCO3896 gene product and polynucleotide phosphorylase
P. Bralley, B. Gust, S. Chang, K. F. Chater and G. H. Jones
627–636

The TraA relaxase autoregulates the putative type IV secretion-like system encoded by the broad-host-range Streptococcus agalactiae plasmid pIP501
B. Kurenbach, J. Kopeć, M. Mágdefrau, K. Andreas, W. Keller, C. Bohn, M. Y. Abajy and E. Grohmann
637–645

A putative sensor kinase, Hik31, is involved in the response of Synechocystis sp. strain PCC 6803 to the presence of glucose
S. Kahlon, K. Beeri, H. Ohkawa, Y. Hihara, O. Murik, I. Suzuki, T. Ogawa and A. Kaplan
647–655

Phosphoethanolamine substitution in the lipid A of Escherichia coli O157:H7 and its association with PmrC
S.-H. Kim, W. Jia, V. R. Parreira, R. E. Bishop and C. L. Gyles
657–666

In vivo characterization of the dTDP-D-desosamine pathway of the megalonomic gene cluster from Micromonospora megafonincia
E. Rodríguez, S. Peirú, J. R. Carney and H. Gramajo
667–673

Front cover illustration
Confocal laser scanning microscopy (CLSM) image of an Enterococcus faecalis biofilm. Image courtesy Bastiaan P. Krom, University Medical Center Groningen, The Netherlands. See the paper by van Merode et al. in this issue, pp. 807–814.

Porphyromonas gingivalis enhances FasL expression via up-regulation of NF-κB-mediated gene transcription and induces apoptotic cell death in human gingival epithelial cells

S. Brozovic, R. Sahoo, S. Barve, H. Shiba, S. Uriarte, R. S. Blumberg and D. F. Kinane

Enterococcus faecalis strains show culture heterogeneity in cell surface charge

A. E. J. van Merode, H. C. van der Mei, H. J. Busscher, K. Waar and B. P. Krom

Plasmid-mediated genomic recombination at the pilin gene locus enhances the N-acetyl-D-galactosamine-specific haemagglutination activity and the growth rate of Eikenella corrodens

H. Azakami, H. Akimichi, Y. Noiri, S. Ebisu and A. Kato

PHYSIOLOGY

Evidence for a cytochrome bcc–aa₃ interaction in the respiratory chain of Mycobacterium smegmatis

J. A. Megehee, J. P. Hosler and M. D. Lundrigan

Adaptation of Bacillus subtilis to growth at low temperature: a combined transcriptomic and proteomic appraisal

I. Budde, L. Steil, C. Scharf, U. Völker and E. Bremer

The impairment of superoxide dismutase coordinates the derepression of the PerR regulon in the response of Staphylococcus aureus to HOCl stress

S. Maalej, I. Dammak and S. Dukan

PLANT–MICROBE INTERACTIONS

The role of dsbA in colonization of the wheat rhizosphere by Pseudomonas fluorescens Q8r1-96

Absence of plasmids encoding adhesion-related proteins in non-insect-transmissible strains of Spiroplasma citri

N. Berho, S. Duret and J. Renaudin

THEORETICAL MICROBIOLOGY

Thermodynamic boundary conditions suggest that a passive transport step suffices for citrate excretion in Aspergillus and Penicillium

W. Burgstaller
