Corrigendum

Bmh1p (14-3-3) mediates pathways associated with virulence in *Candida albicans*

Michelle N. Kelly, Douglas A. Johnston, Bethany A. Peel, Timothy W. Morgan, Glen E. Palmer and Joy E. Sturtevant

*Microbiology* (2009) 155, part 5, 1536–1546

On page 1, line 16 of the Abstract, the sentence ‘Most importantly, our results suggest that the delayed onset of lag-phase growth *in vitro* at 37 °C, and not at 30 °C, results in an inability of these mutants to rapidly adjust to environmental changes *in vivo* and may be responsible for their increased clearance and reduced virulence’ should read ‘Most importantly, our results suggest that the delayed onset of log-phase growth *in vitro* at 37 °C, and not at 30 °C, results in an inability of these mutants to rapidly adjust to environmental changes *in vivo* and may be responsible for their increased clearance and reduced virulence’.
