PARASITOLOGY

Editors: D. KEILIN and P. TATE

Vol. 52, Nos. 1 & 2

May 1962

Subscription price is £5 net per volume

Cambridge University Press, 200 Euston Road, London, N.W.1
AGAR No. 3 has been developed by the Oxoid Laboratories as a high-quality neutral agar which does not cause phosphate precipitation and needs no filtration. Furthermore, it will gel at concentrations of as little as 1%.

Agar No. 3 is the most inexpensive high-quality agar available.

For progressive laboratories
OXOID PEPTONES

The Oxoid Laboratories have developed a range of peptones differing widely in their properties so as to meet the requirements of workers in many varied fields.

OXOID PEPTONE L37
is used extensively for all routine purposes in laboratories throughout the world. It is a high-quality peptone which gives consistently good results with standard culture media.

OXOID PROTEOSE PEPTONE L46,
a more specialized peptone, is prepared by the papain digestion of selected fresh meat, for use in media for the production of bacterial toxins.

OTHER OXOID PEPTONES AND HYDROLYSATES:
Peptone L6, Tryptose, Soya Peptone, Mycological Peptone, Tryptone, Tryptone "T,"
Casein Hydrolysate (Acid), Peptone "P," Liver Digest Peptonized Milk.

Microbial Classification
EDITED BY G. C. AINSWORTH
& P. H. A. SNEATH

A Symposium devoted to a consideration of the many problems involved in the taxonomy of the many groups of micro-organisms. The contributors discuss the use of morphological, biochemical and genetic characters in microbial classification and examine how far the taxonomic concepts and principles which have been developed in relation to the larger organisms can be applied to micro-organisms.

Society for General Microbiology, Symposium 12.

Contents of Vol. 29, No. 2. June 1962

Shortened Titles of Articles

The determination of glyceride glycerol. J. H. Moore.
Histochmical detection of alkaline phosphatase in cheese. V. Bolcato.
A modified form of lactoperoxidase isolated from milk cultures of Streptococcus cremoris or Streptococcus lactis. A. Pickering, J. D. Oram and B. Reiter.
Preparation of K-casein and some observations on its nature. G. C. Cheeseman.
Quelques facteurs de variation de la teneur en calcium des laits de vaches. P. Auriol et G. Mocquot.
An indirect measure of machine milking rate. T. K. Griffin and F. H. Dodd.
Associations of ninhydrin-reacting compounds in the seeds of 49 species of Lathyrus. By E. A. Bell.
Staphylococcal penicillinase and the new penicillins. By R. P. Novick.
The degradative metabolism of L-cysteine and L-cystine in vitro by liver in cystinosis. By A. D. Patrick.
The function of vitamin B₆ in the metabolism of propionate by the protozoan Ochromonas malhamensis. By H. R. V. Arnstein and A. M. White.
Biochemical changes in the tissues of animals injected with iron. 3. Lipid peroxidation. By L. Golberg, L. E. Martin and A. Batchelor.
The synthesis of cell constituents from butane-2,3-diol by Pseudomonas sp. By R. P. Hullin and H. Hassall.
The qualitative analysis of the cell walls of selected species of fungi. By E. M. Crook and I. R. Johnston.
Serum proteins and the livetins of hen's-egg yolk. By J. Williams.
A comparison of conalbumin and transferrin in the domestic fowl. By J. Williams.
The oxidation of reduced flavin mononucleotide by molecular oxygen. By Q. H. Gibson and J. W. Hastings.
Effects of insulin and diet on the metabolism of L(+)-lactate and glucose by the perfused rat heart. By J. R. Williamson.
Regulation of glucose uptake by muscle. 6. Fructose 1,6-diphosphatase activity of rat heart and rat diaphragm. By E. A. NewsHolme and P. J. Randle.
Oxidation of short-chain fatty acids (C₃—C₅) by ram, bull, dog and fowl spermatozoa. By T. W. Scott, I. G. White and E. F. Annison.
Glucose and acetate metabolism by ram, bull, dog and fowl spermatozoa. By T. W. Scott, I. G. White and E. F. Annison.
The exchange of 131I-labelled lipid and 131I-labelled protein between red cells and serum. By N. C. Hughes Jones and B. Gardner.
The action of sulphate and phosphate esters of oestrogens on the reconstitution of two pyridoxal 5-phosphate-dependent enzymes. By V. Scardi, M. Iaccarino and E. Scarano.

Subscription price per volume 80s. net. $13.50 in U.S.A.
