MSE ‘HIGH-SPEED 18’ REFRIGERATOR CENTRIFUGE with Continuous Action Rotor

In addition to its large capacity angle rotors — up to 6 x 250 ml at 12,000 r.p.m. (23,000 x g), or 6 x 100 ml at 18,000 r.p.m. (40,000 x g), this versatile refrigerator centrifuge has a Continuous Action Rotor available as an accessory. It has a practical throughput of between 1 and 2 litres per minute at 18,000 r.p.m. (21,000 x g) and is primarily intended for the collection of small quantities of solids from large volumes of liquid, as, for example, in the harvesting of microorganisms from bulk culture.

Other features include electronic speed control and preselection, high-efficiency hermetically sealed refrigeration unit, stainless steel centrifuging chamber and automatic brake. May we send you full details?
