The Lister Institute of Preventive Medicine (University of London)

Applications are invited for two positions in the Microbiology Department (Guiness—Lister Research Unit).

The first is for a Research Assistant to work on bacterial plasmids, notably R factors; commencing salary £1,040 + £60 London Allowance p.a. with F.S.S.U.

The second is a Post-Doctoral appointment. The Department is engaged whole-time in research, without undergraduate teaching or routine responsibilities, and candidates should have a good academic record and a capacity for independent work. Salary will be determined by circumstances and the appointment will initially be for three years, with the possibility of renewal.

Neither position necessarily requires purely microbiological experience, as the Department has broad interests in bacterial genetics and physiology, and experience in related fields like genetics and biochemistry will be welcomed. Candidates should be available for interview and should first write enclosing a curriculum vitae to the Secretary, Lister Institute, Chelsea Bridge Road, London S.W.1.

The Journal of Hygiene

Edited by R. M. FRY Department of Pathology, University of Cambridge

The Journal of Hygiene publishes original research on bacterial and virus disease of man and animals. It covers the identification of pathogens, epidemiology and immunology.

The Journal of Hygiene was founded in 1901 and is published quarterly. Annual subscription £7 net ($23 in the U.S.A.)

Specimen copies and quotations for back volumes are available from the publishers.
