Just one of the masterpieces from The Corning Collection

**in glass and plastic**

CORNING® disposable sterile tissue culture dishes are available in 3 sizes; 35 x 10mm, 60 x 13mm and 100 x 20mm. These dishes are made in optically-clear polystyrene, the interior surfaces are specially treated for optimum cell attachment, and growth. All dishes are vented, and designed to allow for convenient stacking. They are supplied in tear-strip polyethylene sleeves of twenty. Each product batch is stringently tested for sterility and cell growth.

Look for CORNING DISPOSABLES – a name you can rely on in disposable laboratory products.
