Microbial Energetics
Edited by B. A. HADDOCK and W. A. HAMILTON

The 27th Symposium of the Society for General Microbiology focuses attention on the cross-fertilisation of ideas that are currently enriching the fields of bioenergetics and microbial physiology. This volume provides a timely and stimulating account of an important area of research that is basic to the biological sciences and of particular interest to microbiologists and biochemists.

Defence Mechanisms of Plants
BRIAN J. DEVERALL

A short and integrated account of the dynamic mechanisms involved in the defence of plant cells against attack by parasitic bacteria and fungi. The central interest of the volume is with the processes by which plant cells perceive the approach of an intruder and occasionally permit, but usually discourage, its further progress. The monograph will interest all who are professionally concerned with plant disease.

Journal of Food Technology
Volume 11 Number 6 December 1976

Contents

The detection and estimation of soya protein in food products by isoelectric focusing. J. W. Llewellyn and B. Flaherty

Equilibrium moisture contents of air dried beef. Dependence on drying temperature. Hector A. Iglesias and Jorge Chirife

Iron availability from intermediate moisture beef. Z. A. Obanu, Ruth J. Biggin, R. J. Neale, D. A. Ledward and R. A. Lawrie

Wiltshire curing with and without nitrate. II. Vacuum packed collar bacon and vacuum packed bacon from pigs with high ultimate pH. A. A. Taylor, B. G. Shaw and P. D. Jolley

Supplementation of bread with soybean and chickpea flours. Soad A. M. Youssef, Ali Salem and Abdel Hamid Y. Abdel-Rahman

A method for measuring tomato fruit firmness using a modified shear press. T. R. Gormley and D. Koppel

Autolysis and proteolytic activity of cod viscera. Jan Raa and Asbjorn Gildberg

A computer method for the analysis of dilatometric measurements on fats. M. F. Murphy and J. P. Brady

Diffusion phenomena during the decaffeination of coffee beans. Bernard Bichsel, Stefan Gäl and Rudolf Singer

Influence of extraction medium pH on the protein content of some legume starches. C. G. Anderson and C. R. Romo

Book reviews

The Journal of Food Technology is published bimonthly, each issue consisting of 90–120 pages; six issues form one volume. The annual subscription is £35.00 (U.K. and Overseas), $110.00 (N. America) post free. Back volumes are still available.
