Subspecies Names Automatically Created by Rule 46

J. P. EUZÉBY*

Laboratoire de Bactériologie, École Nationale Vétérinaire, Toulouse, France

Two type subspecies names created automatically under Rule 46 are presented.

In the course of maintaining my own database, I have discovered two type subspecies names that were created automatically under Rule 46 of the Bacteriological Code (1990 revision) and that had not previously been validly published.
