**Citriconis parietis** sp. nov., isolated from a mould-colonized wall and emended description of *Citriconis alkalitolerans* Li et al. 2005

Jenny Schäfer, Karin Martin and Peter Kämpfer

In Table 1 on page 273 of this paper, it is erroneously stated that utilization of sucrose is both positive and negative for all strains examined. The correct information is that sucrose utilization is positive for all strains.

doi:10.1099/ijs.0.67734

**Amycolicicoccus subflavus** gen. nov., sp. nov., an actinomycete isolated from a saline soil contaminated by crude oil

Ya-Nan Wang, Chang-Qiao Chi, Man Cai, Zhi-Ying Lou, Yue-Qin Tang, Xiao-Yang Zhi, Wen-Jun Li, Xiao-Lei Wu and Xun Du

The authors of this paper would like to correct a mistake in the location given for the isolation of the novel strains. Strains DQS3-9A1 and DQS3-9A2 of *Amycolicicoccus subflavus* gen. nov., sp. nov. were actually isolated from the Daqing Oilfield in China and not the Shengli Oilfield, China, as stated in the abstract and text.

doi:10.1099/ijs.0.67733

**Candida spencermartinsiae** sp. nov., **Candida taylorii** sp. nov. and **Pseudozyma abaconensis** sp. nov., novel yeasts from mangrove and coral reef ecosystems

Adele Statzell-Tallman, Gloria Scorzetti and Jack W. Fell

Due to an error introduced during final manuscript preparation, an incorrect table was inserted that reported that the two species *Candida spencermartinsiae* and *Candida taylorii* fermented several carbon compounds. Those data are incorrect, as neither species has demonstrated the ability to ferment. The correct Table 2 is given overleaf.
