Towards a taxonomic coherence between average nucleotide identity and 16S rRNA gene sequence similarity for species demarcation of prokaryotes

Mincheol Kim, Hyun-Seok Oh, Sang-Cheol Park and Jongsik Chun

‘Intragenus’ in the labels of Fig. 1a, 1b and 3a should be ‘Intergenus’.

Histogram colour names in the caption of Fig. 1 were incorrectly described. The correct expression is as follows: ‘between two strains belonging to the same species (light pink), belonging to different species (light purple) and belonging to different genera (pale green). Overlapped regions between intraspecies and interspecies, and between interspecies and intergenus, are displayed in turquoise and violet, respectively.
