Corrigendum: Death and gastrointestinal bleeding complicate encephalomyelitis in mice with delayed appearance of CNS IgM after intranasal alphavirus infection

Victoria K. Baxter,1,2†‡ Elizabeth M. Troisi,1† Nathan M. Pate,2 Julia N. Zhao1§ and Diane E. Griffin1,*

There was an error on page 10, in the fifth paragraph of the published article.

The sequence provided in the methods for the nsP2 RT-PCR Taqman probe is incorrectly given as the same sequence as the E2 probe.

The correct probe is:

5’-6-carboxyfluorescein (FAM)-CCATTGCCGCCAACTCTCCC-6-carboxytetramethylrhodamine [TAMRA]-3’

The author apologizes for any inconvenience caused.
