CORRIGENDUM

Cell Wall Assembly in *Bacillus subtilis*: Visualization of Old and New Wall Material by Electron Microscopic Examination of Samples Stained Selectively for Teichoic Acid and Teichuronic Acid

By TAREK MERAD, A. RONALD ARCHIBALD, IAN C. HANCOCK, COLIN R. HARWOOD AND JAN A. HOBOT

*Journal of General Microbiology* (1989), 135, 645–655

In Fig. 2, p. 649, the arrows labelled B in parts (a) and (b) were incorrectly positioned by the printers. The correct version is shown below.

![Corrected Fig. 2](image)

Fig. 2. Deposition of new cell envelope material in *B. subtilis* 168 during transition from magnesium to phosphate limitation. Bacteria were equilibrated under magnesium limitation at a dilution rate of 0.2 h⁻¹ and the inflowing medium was changed to effect phosphate limitation. Samples were collected (a) 5 h, (b) 8.5 h, (c) 10 h, (d) 10 h, (e) 11.5 h and (f) 13 h after changeover. Bar marker, 0.2 μm. Layers A, B and C, and the feature indicated by the arrowheads, are discussed in the original paper.
