The editors of Microbiology are pleased to announce the launch of Microbiology Comment, a new section publishing informal communications and opinions. As indicated in previous issues, this section is intended to provide a platform for readers of Microbiology to communicate their personal observations and opinions in a more informal way than through the submission of papers. Most of us feel, from time to time, that other authors have not acknowledged the work of our own or other groups or have omitted to interpret important aspects of their own data. Perhaps we have observations that, although not sufficient to merit a full paper, add a further dimension to one published by others. In other instances we may have a useful piece of methodology that we would like to share.

The editors hope that readers will take full advantage of this section and use it to raise matters that hitherto have been neglected. Contributions should be addressed to the Editor-in-Chief via the Editorial Office. A short title (fewer than 50 characters) should be provided. Communications should be in the form of letters and should be brief and to the point. A single small Table or Figure may be included, as may a limited number of references (cited in the text by numbers, and listed in alphabetical order at the end of the letter). A short title (fewer than 50 characters) should be provided.

The editors of Microbiology do not necessarily agree with the views expressed in Microbiology Comment.

Contributions should be addressed to the Editor-in-Chief via the Editorial Office.
